

# Albums

Tell the story of your special day with a custom designed album and have something tangible to share with your family and friends. Let me do the work to create a beautiful album with hand-crafted touches, so you don't have to! Every heirloom album is crafted with fine, high quality materials and each page is a true photographic "print" - That means that the images are developed into the paper using silver halide and other materials, just like in a darkroom.

## Leather

We use 100% natural, Italian leathers that are selected for their exceptional texture, strength, and durability. The Distressed leathers enamor with their aged beauty. Colored leathers are both smooth and luxurious.

## Linen

The layered weaves of the linen highlight the craftsmanship and beauty of your albums. Fine Linen (+\$50) has a large weave with a pronounced texture. Select Linen has a delicate weave with a parallel texture. Japanese Silk has a soft, sleek texture that is natural to the smooth fibrils of silk.
