## ENERGETIC HORMONAL IMBALANCES + ENERGETIC TOXINS

You were scanned to find resonating hormonal imbalances. Those imbalances are detected below:

- Low Aldosterone
  - A corticosteroid secreted by the adrenal cortex. It increases sodium reabsorption by the kidneys, thereby indirectly regulating blood levels of potassium, chloride, bicarbonate, as well as pH, blood volume and blood pressure.
- Low Bradykinin
  - A group of polypeptides that have considerable biological activity. They are capable of influencing smooth muscle contraction; inducing hypotension; increasing the blood flow and permeability of small capillaries; and inciting pain.
- Low Parathyroid Hormone
  - A protein hormone released by the parathyroid gland that controls calcium, phosphorous, and vitamin D levels in the blood.
- Low TSH
  - Secreted by the anterior lobe of the pituitary gland, stimulates the thyroid gland

With BioResonance testing, we're looking for what pathogens are resonating, causing these areas to be stressed. Your scan revealed the biggest resonating stressors affecting your body are:

- Parasites, Protozoa and Liver Flukes
  - Mycoplasma, rickettsia, clonorchis, trypansomoma
- Chemicals
  - Acetic acid glacial, nitroglycerin
- Heavy Metals
  - Aluminum, rhenium
- Mold and fungus
  - Hormodendrum cladisporium, tinea pedis
- Viruses
  - Epstein-barr, influenza a, coxsackie b1

Now that some of the main causes have been identified, we look to restore balance in the body using physician-grade supplements, homeopathy, herbs, whole food nutrition and lifestyle adjustments.
