

Jazzy The Mystic

Essential Beliefs - Jazzy The Mystic

I adopted these beliefs as a result of my spiritual evolution. I did not hold any of these beliefs prior to my spiritual awakening on November 11, 2019.

1. I have the power to create a meaningful, prosperous, and fulfilling life.

Through my personal choices, I can create the life that I desire. Actually, it is my responsibility to do so. There is no savior who will come and rescue me from my problems. Also, I refuse to carry a victim mentality or harbor bitterness due to adverse circumstances that I have faced.

2. I become more on the inside in order to experience more on the outside.

I understand that creation goes from the metaphysical realm to the physical realm. And that what I experience on the outside corresponds to who I am on the inside. Therefore, I look inward and elevate into higher states of being so I can have better life experiences.

3. I connect to my inner divinity for clarity, insights, and direction.

My view of God is internal. I believe that my soul is my inner divinity or God within. I have a direct connection to God through personal spiritual practices, without having to read any doctrine or adhere to any religion. I tune into my soul for guidance on what is highest and best for my life.

4. I trust my inner knowing on what people, places, and opportunities are right for me.

I make decisions according to my internal guidance system. I fully trust what I sense and know from within. I follow my intuitive instincts, intuitive understandings, and intuitive insights on what is right for me, even when it defies logic.

5. I surrender to my soul's higher path of destiny that is marked by divine flow.

There is a purpose or calling that my soul came here to fulfill on earth. However, I have free will on whether or not to pursue my soul's higher path. Before I got into alignment with my soul, I encountered a lot of obstacles, resistance, and blocks in my life. Now that I have surrendered to my destiny, I experience divine flow along with meaningful signs, symbols, and coincidences.
