Post-Production Workflow

All wedding collections include wedding day labor, unlimited phone and office consultations, and the following post-production workflow:

Culling of wedding images: Every image taken is viewed and evaluated, outtakes are discarded, and files are organized and sorted chronologically.

*Time estimate: 1 hour per hour of shooting

Editing of wedding images: The RAW images are edited in Lightroom. Images are cropped as needed and color & density enhanced. The edited RAW images are then exported from Lightroom as high resolution JPEGs.

*Time estimate: 2 hours per hour of shooting

Retouching of wedding images: The JPEG images are opened and retouched in Photoshop. For regular collections, light facial retouching is included for the couple in the wedding party, family, and couple portraits (candid photos are not retouched). For premium collections, light facial retouching is included for the couple in every image.

*Time estimate: 5 hours per hour of shooting for regular collections, 10 hours per hour of shooting for premium collections

Uploading and archiving of wedding images: After the retouching is completed, the wedding images are archived and then uploaded into the couple's personalized online gallery.

*Time estimate: Archiving of images-1 hour; Gallery setup and uploading-3 hours
