

INSTRUCTIONS

grab your hanging material & let's do this!

STEP 1: ANCHOR

IF YOU'RE ANCHORING TO ALREADY EXISTING ANCHOR POINT (COLUMN OR RAILING):

Use the included stretchy long balloon to loop around the garland's centerline and around your anchor point.

Tie in a knot.

IF YOU DON'T HAVE AN ALREADY ESTABLISHED ANCHOR POINT:

Use the included command hook/s with an attached balloon "bracelet" to create an anchor point on a wall.

Make sure to hang the Command Hook 10 mins before you attach your garland to allow your command hook to properly adhere.

STEP 2: ATTACH

Have someone hold the garland in place while you stretch the balloon bracelet towards the closest balloon.

STEP 3: SECURE

Gently guide the balloon bracelet around the balloon and onto its base or neck.

STEP 4: FLUFF & FINISH

Most of the mini balloons can be easily repositioned, so make sure they're towards the front and have fun moving them slightly to achieve the look you like best.
