NINA LICHTENSTEIN / ACCURATE

ABOUT THE COLLECTION

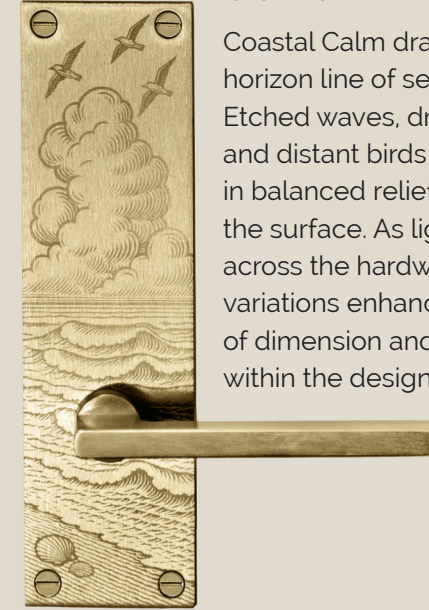

Nina Lichtenstein and Accurate's collaboration reimagines hardware, turning it into unexpected canvases that embed the stress-reducing power of nature directly into the door's surface. These subtle, neuroaesthetic details make every touch a moment of connection and healing. Etching on brass visually shifts in tone with changing light, creating a dynamic surface that interacts with its surroundings. This interplay transforms the hardware into an architectural detail that evolves throughout the day.

BIRCH FOREST

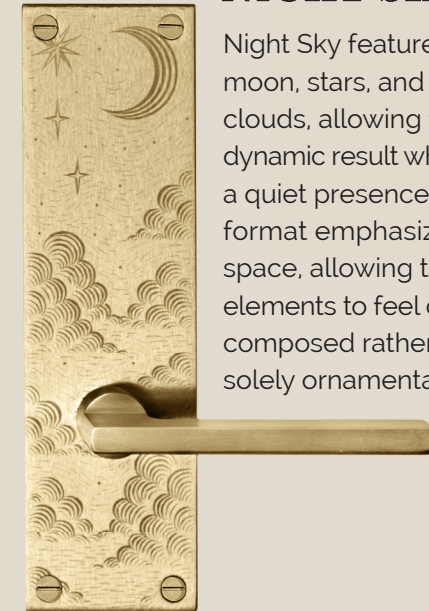

Birch Forest translates the vertical rhythm of a woodland grove into a refined architectural detail. Etched, slender tree forms create depth and texture that shift subtly with changing light. The composition is structured yet organic, bringing a sense of order and quiet warmth to residential interiors.

COASTAL CALM

Coastal Calm draws from the horizon line of sea and sky. Etched waves, drifting clouds, and distant birds are composed in balanced relief across the surface. As light moves across the hardware, the tonal variations enhance the sense of dimension and movement within the design.

NIGHT SKY

Night Sky features a crescent moon, stars, and softly layered clouds, allowing for a visually dynamic result while maintaining a quiet presence. The vertical format emphasizes negative space, allowing the celestial elements to feel deliberate and composed rather than solely ornamental.
