

These items are NOT all MUST-HAVES for your detail photos. This document is simply meant to give you an idea of the kind of things that you can include for your detail photos and how you should prepare them for your wedding photographer. Some may not apply to you and your unique situation.

The easiest way for your photographer to capture these personal details is if you have everything gathered BEFORE your photographer arrives. Either collect everything in a box or lay it out in the area you wish for them to be photographed so that your photographer can start with them right away.
