

TABLE BAR DESIGN GUIDE

HOW TO USE THIS GUIDE

We created this guide to get you acquainted with our process and help you understand all of your options for designing your table. This is meant to serve as a starting point of inspiration and understanding for you. We're happy to discuss design ideas you have in mind that may not be shown in our guide.

- Shape + Sizing:** Gives you a more in-depth look at possible shapes and sizes for your table.
- Edge Profile:** Shows you a variety of edge profiles you can choose from.
- Base + Leg Design** Highlights a number of base and leg designs available to you.
- Patterns + Pricing:** Lays out the different pattern and pricing options for your table top
- Wood Options:** Showcases the most locally accessible wood types (but we can work with you to source whatever wood you're interested in)
- Maintenance + Care:** Gives you a rundown of basic care and maintenance tips for your table.

SHAPE + SIZING

RULE OF THUMB when it comes to table sizing: the average dining table width is 36-42”.
For length, you need at least 2-2.5 feet (24”-30”) per person for someone to be seated comfortably at a table.

WOOD OPTIONS

Choosing the right type of wood for your table can be an overwhelming step of the design process. Luckily, we give you the option to order some samples during the planning process so you can see, feel, and even smell the difference between wood types.

If you don't see what you're looking for in this list, no problem! These are just the most locally accessible wood types and we can work with you to source whatever you are looking for.

**Note:* We typically try to avoid staining table tops to achieve the final color because the wood character is more visible and it removes the possibility of stain fading over time. However, if you have your heart set on staining, we are happy to accommodate!

TABLE TOP PATTERNS + PRICING

Pricing for your table depends on a multitude of factors, the biggest being wood type and the second being the table top pattern. Take a look at this chart to get an idea of how pricing changes depending on the top design you choose.

*Note: All seams are well-hidden and nearly invisible when joined.

EDGE PROFILE

The edge profile of a table is frequently overlooked, but has the potential of adding so much character and uniqueness to your piece! Here are a few classic edge profiles that we love.

NOTE: Sometime the table top pattern you choose can affect which edge profiles are available to you. For example, we wouldn't be able to build a round live edge table or a Cevron/Herringbone live edge table.

Round Edge

Half round
Top Edge

Half round
Bottom Edge

Live Edge

Live Edge is a style where the natural edge of the wood is incorporated into the design of the piece.

BASE + LEG DESIGN

When it comes to legs and bases, let’s just say you have options! Here are some classics to get you started. The shape and size of your table may dictate which type of base/leg design you need. Depending on what you choose, we can either make them in house or order them from one of our favorite suppliers.

- AVAILABLE IN WOOD
- AVAILABLE IN METAL
- AVAILABLE IN CAST IRON

Note: If you want a table with wooden legs, an apron will most likely be used hide any corner blocks, bracing, or other mechanical pieces required to attach the legs from plain view.

ON CAST IRON
BASES

BASE + LEG DESIGN

We partner with JCS Casting Co for Cast Iron bases. These can be used on standard tables, benches, counter-height tables, and bar-height tables. Each height has a number of style options and colors to choose from.

MAINTENANCE AND CARE

We strive to make your table maintenance as minimal as possible, using high-quality waxes and oils, so that you can spend more time building community at your table and less time cleaning it. We are not responsible for repairing or replacing furniture that hasn't been properly cared for.

CLEANING

All you need for day-to-day cleaning is a damp rag. Add some mild soap (avoid abrasive, bleach, or silicone-based cleaners) to clean up any large spills.

If you're a table-care nerd (no shame, we certainly are) then check out the ***Osmo Spray Cleaner*** for daily cleaning. You can also apply their ***Liquid Wax Cleaner***, depending on how much you use your table, to maintain the shine and to clean off anything that doesn't come off with a rag and soap.

GENERAL CARE

- Use coasters and hot pads between hot/cold objects and the wood whenever possible. This isn't a must, but it's an easy step you can take to make the finish last as long as possible.
- Wear and tear is bound to happen to some extent. But don't fret! The finish we use on our tables makes refinishing your table a breeze. You'll get more info and instructions on that upon receiving your table.

NATURAL EXPANSION AND ACCLIMATION

We do everything in our power to stabilize any problem areas that could cause major movement in the wood prior to receiving your table. That said, wood is obviously a natural product and is prone to change some with it's environment. Things such as temperature, light exposure, and humidity may cause slight color changes and expansions in the wood. Like we said, this is natural, but it helps to be mindful of these factors. Do not place your table near furnaces, space heaters, or radiators and use blinds or curtains when possible to keep your table from being in direct sunlight during the day.

Follow these guidelines and your table is sure to age like fine wine.
Or cheese. Both are great.

GETTING STARTED ON YOUR PROJECT

Now that you have a better idea of how our process works and what your options are you can head over to the the **“Get a Quote”** page on our website and get started on your project today!

Helpful things to include in your quote form:

- Table Size (or how many you want to seat)
- Desired Table Shape
- Wood Types or color preferences
- Desired table Top Pattern
- Edge Profile preferences
- Leg/Base material and design preference
- Design Reference/Inspiration photos
