

WEDDING DAY KITS

Exactly what we take to all the weddings planned by Harmony Creative Studio. We don't actually make one big kit – we've found it's more helpful to have things live where people will need them. This cuts down on having to find things. For example: Guests will often ask us for a band aid, and it's a lot easier to say 'Oh, there's plenty of them in the basket in the restroom.' than actually having to find it and deliver it to them.

These are the things we have found are most used. If it's not listed, we've literally never been asked for it over 120+ weddings, and chances are you won't need it. There are a few things that will seem strange, I can't list why each one would be needed but you can look it up. (Ex: I've used that butter knife at literally every wedding to open picture frames without breaking a nail.)

BRIDAL SUITE/DRESS KIT
