Plastic Has Consumed Every Aspect Of Our Lives

Did you know the majority of plastic ever created since the dawn of time (okay, the 1950s) still exists in some form, it's even inside our bodies. And it's going to outlive us all. And our grandkids, and our grandkids' grandkids, and our grandkids' grandkids' kids!

Over 1 million marine organisms are killed each year due to ocean plastic pollution.

Plastic takes 450 years to never to decompose (AKA break down into smaller microplastics)

Only 9% of all the plastic waste ever generated has been recycled.

33 billion pounds of plastic pollute the ocean each year.

It's time to break the single-use habit and end plastic pollution.

You're the Key to a Greener Future!

Every individual has the power to make a positive change to help end plastic pollution. **Whether you believe it or not, small everyday habits can create big impacts on the future of our planet.** We drive the demand based on what we consume and discard every year.

IT IS TIME TIME TO RETHINK THE WAY WE CONSUME!

Unfortunately, we all do not have the time or means to be the next Greta Thunberg or to accumulate an amount of trash

that only fits into a mason jar. Come on, we are talking real life here and that is not realistic. You need something that helps you make small, sustainable changes that fit into every area of your life. And you need it quickly! You have to think about work, school, family, kids, groceries, and of course TikTok!

The Zero Waste Starter Kit is everything you need to start reducing your waste quickly and easily.

Loving these laundry detergent sheets!

The kit is incredible! Really helped me get on track with my journey towards living a more low-waste lifestyle. I really really loved a few products in particular within this kit that were easy swaps to start implementing long term. The laundry detergent sheets and dryer balls are my fav, and the shampoo and conditioner bars were also fantastic!
