## PROFILE

Esther's unique story is seemingly sad. Esther's mother is mentally unstable, and Esther has no idea who her father. Leaving her alone with no way to better her circumstances. However, someone saw Esther's struggle and removed her from her home. Which given the circumstance was a terrible situation for her. Through this selfless act Esther was able to finish primary school. Now that she is in high school her guardian angel can no longer afford her education as high school is very expensive.

As of recently, Esther has found a family who is willing to care for her. Her maternal uncle has become her guardian and has been caring for her. Until recently her uncle has been paying for her schooling. However, her uncle lost his job and has not been able to pay for her schooling.

Esther has been informed that she has an older sibling and two other young ones who she has never met. Asking her how it feels, she says that she feels sad that her mother is not mentally well and wishes that she could be able to do something to make her better.

Esther is in her final year of high school and her hope is to see it finished.
