Materials: Game pawns | Game cards

Let's Play

Begin by finding a flat surface on which you can play your game comfortably. Then, place your game cards face-down in a pile nearby.

Each person or team member chooses a game pawn as his or her playing piece. On your turn, draw one card from the pile and move your pawn around the world as directed below. Your turn is over. Place the card at the bottom of the pile to reuse it.

When you draw a card with one color block, move your pawn forward to the matching color space. When you draw a card with two color blocks, move your figure forward to the second matching color space on the path. When you draw a picture card, move your figurine forward OR backward on the path to the picture on your card.

The first player to travel around the world wins!
On your mark, get set, GO!
