

45

Number of samples taken each month.

25

Number of surface water testing sites.

20

Number of ground water bores being installed.

All samples (ground and surface) are taken every 4 weeks.

1 in 10 samples are tested twice. With 1 in 20 samples being tested up to 3 times.

810

Total expected number of water samples tested during NSP's Development Phase.

Environmental water monitoring is being undertaken every 4 weeks for the next 12-18 months.

Water monitoring will continue during the operational phase to ensure compliance.

Data will be incorporated in the EIS that the regulator will use to assess our proposal prior to approval.
