MESSAGE FROM THE BOARD

For more than six decades, the Independent College Fund of Maryland (I-Fund) has worked to expand college access, improve student success, and prepare future leaders and skilled workers. The I-Fund member colleges and universities provide excellent educational opportunities—empowering students with the knowledge to comprehend complex matters, understand diverse cultures, communicate effectively, and think critically. Students attending I-Fund institutions are afforded transformational experiences that lead to rewarding careers and meaningful lives.

The I-Fund's 12 member colleges and universities provide high-quality, affordable educational opportunities to 66,000 students enrolled in more than 1,700 academic programs throughout the State of Maryland. Many students attending the I-Fund institutions are the first in their families to attend college, almost half are students of color, and 25 percent are low-income students. The scholarship programs funded by your donations are vitally important to these and other students who seek a broad, global, cross-cultural education that empowers them to understand complex human interactions and pursue a meaningful career and a life worth living. Your donations are vitally important to their futures and our collective well-being. Without this support, students would have fewer choices and fewer opportunities to achieve their academic goals. The I-Fund is very grateful to its donors for supporting the college dream.

The following report highlights the private, nonprofit sector of higher education in Maryland and the various ways the I-Fund supports its member institutions. These efforts are only possible with the generosity of donors.

Sincerely,

Nora Demleitner, President
I-Fund Board of Directors

ACCESS

The I-Fund member colleges and universities offer a diverse array of high-quality academic programs and distinctive educational experiences. The mission of the I-Fund is to support students who would benefit from enrolling at an I-Fund member institution and to expand college access for students who are underrepresented in higher education.

The I-Fund supports college **ACCESS** by offering grants and scholarships to demographically diverse and deserving students. Through the support of organizations, such as the I-Fund, and the generosity of donors, the I-Fund member colleges and universities serve 66,000 students. The demographics of students who attend these institutions are similar to the demographics of students who attend a Maryland public university.

66,000

STUDENTS ENROLLED

25% are low-income students

37% are Maryland residents

35% are students of color

56% are women

74% graduate within 6-years

CHOICE

Hood College

Every I-Fund institution offers undergraduate classes and several offer graduate studies and continuing education for lifelong learners. Several I-Fund institutions offer an education connected to a particular cultural exploration. Some offer unique programs not available anywhere else in the State. Collectively, these 12 institutions offer more than 1,700 approved academic programs.

The I-Fund enhances degree completion rates and timely graduation by providing grants and scholarships to students who make the **CHOICE** to attend an I-Fund member institution.

These educational offerings create a strong incentive for Maryland's citizens to pursue higher learning within Maryland and attract out-of-State students to the State. Many of these out-of-State students remain in Maryland to pursue their professional careers. Undoubtedly, an educated workforce is the foundation for the State's future progress and prosperity.

1,700

APPROVED
ACADEMIC
PROGRAMS

OPPORTUNITIES

I-Fund colleges and universities offer quality educational experiences, which empower students with knowledge and teach students to understand diverse cultures, communicate effectively, and think critically. Students learn to work in teams, analyze complex issues, and engage in ethical reasoning.

Through small class sizes and frequent interaction with faculty, students enjoy opportunities not available at larger institutions. Often the educational experience and academic programs are unique.

For example, the I-Fund institutions were the first and at one time the only colleges to offer a number of programs in Maryland—such as cybersecurity, forensics, nanobiotechnology, coastal and watershed studies, biomedical engineering, earth and planetary sciences, Near Eastern studies, climate change, robotics, executive MBA, institutional leadership for changing populations, and many more.

College access and student choice lead to unprecedented opportunities for students to reach personal and professional goals.

SUCCESS

Access, choice, and opportunities lead to personal and career SUCCESS! The I-Fund colleges and universities have the highest student retention and graduation rates in the State and the lowest student loan default rates. The high graduation rates at I-Fund institutions help students to control college costs and create financial efficiencies for families.

High graduation rates mean fewer years paying tuition and more years earning money. Seventy-four percent of students at I-Fund institutions graduate within six years.

In addition, students who graduate from an I-Fund institution have a three-year loan default rate of 0% (Source: NSLDS), compared to 2.3% across Maryland and 2.3% nationally.

Maryland's Largest Employer

**102,404 jobs in FY19 \$12.6 billion in
economic output in FY19**

Community of Makers and Doers

3,692 active patents in FY22

Five-year Performance:

The I-Fund's 12 private, nonprofit colleges and universities in Maryland have a profound impact on the State's economic vitality and knowledge-based economy. These schools are extraordinarily effective at producing well-trained and knowledgeable professionals. The ability of these institutions to efficiently graduate degree-holders from exceptional undergraduate and graduate programs lies at the heart of Maryland's prosperity.

Last year, the I-Fund institutions awarded nearly 17,000 degrees. Many of these graduates majored in subjects important to the future of the State's economy, including medical sciences, cybersecurity, teaching, engineering, computing, accounting, finance, hotel management, mathematics, business management, and logistics. Together, the I-Fund's 12 colleges and universities attract billions of dollars in federal and private revenues, which fuel the region's economic engine.

ADDITIONAL SCHOLARSHIPS

St. John's College

NAMED SCHOLARSHIPS

Named scholarships are an excellent way for partners to demonstrate their commitment to higher education and to achieve particular branding or philanthropic goals across the State of Maryland.

DESIGNATED SCHOLARSHIPS

While the I-Fund is committed to providing support for all member colleges, it recognizes that some businesses or foundations may wish to honor institutional allegiances or support particular colleges. Designated scholarships provide this vehicle.

POOLED SCHOLARSHIP FUND

The Pooled Scholarship Fund helps ensure the benefits of an independent higher education are available to many qualified men and women for whom the cost of college would otherwise be out of reach. Scholarships from this fund are awarded to students of all majors; the sole criterion for selection is financial need. Grants fund basic and emergency financial needs.

Washington College

DONORS

Thank you donors for your commitment to high quality educational experiences. Your support has been meaningful. The I-Fund and its member institutions and students appreciate your generosity.
