

Emory Toolbox™ With AI.

Diagnostic Accuracy. Physician Productivity.

 **Toolbox AI.** The first and only Artificial Intelligence solution for nuclear cardiology.

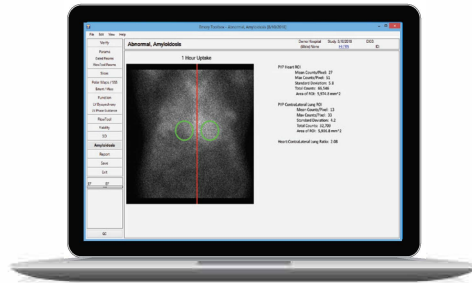

*Faster interpreting and reporting through powerful AI.
Proven diagnostic accuracy equal to the experts.
Tracks steps in justification. Clinician can agree or not.*

Emory Toolbox V4™

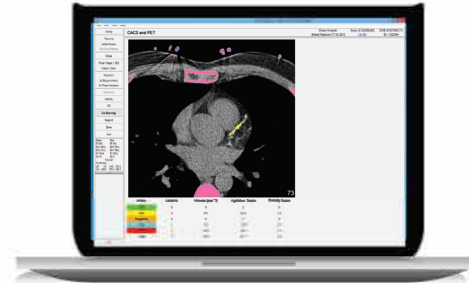

Advanced, Integrated Tools for Smarter, Faster Nuclear Cardiology.

Amyloidosis Analysis

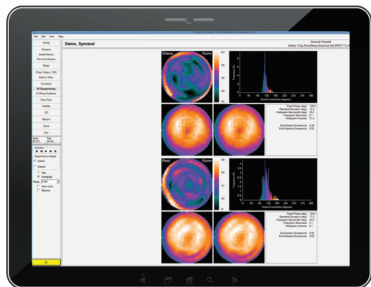

Integrated analysis to assist with the diagnosis of cardiac amyloidosis *

Calcium Scoring

Integrated calcium scoring to improve diagnostic confidence and accuracy *

SyncTool™ for better analysis of heart failure

SyncTool™ is proven to be more sensitive than TDI Echo to analyze LV Dyssynchrony and the benefits of cardiac resynchronization therapy (CRT).

Anywhere, anytime reading and reporting.

Syntermed Live™ makes it possible. And makes it easy.

FlowTool™ Advanced Blood Flow Analysis

Compute Absolute Blood Flow and Myocardial Flow Reserve for improved diagnosis of multivessel and microvascular disease.
