

Dreaming - Daring - Doing

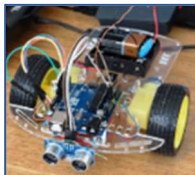

For more than 15 years NGO Ayni Bolivia promotes the economic integration of students through the use of IT technology. Combating structural and sustainable poverty and to promote equality in society.

Next step: Starting AyniTech Academy:

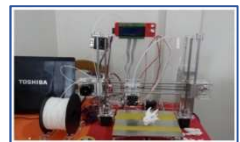

- A “connecting and learning” social educational IT company;
- A technology innovation center for students and entrepreneurs to share ideas, knowledge and skills;
- To deepen the involvement of students with the help of an active learning approach through developing and using interactive applications;
- Using blended learning models, combining face-to-face instruction with online learning activities.

The existing NGO Ayni Bolivia - *supported by the Ayni Foundation in the Netherlands:*

- Will focus on providing scholarships and access to microcredits;
- Keeps supporting the availability of high-quality open courseware via aprendercreando.bolivia.bo.

*If you can dream it.
You can do it.
Walt Disney*

Will you support us doing it?
