

Our exclusive Dental Health Savings Club at The Good Dentist gets you all of the benefits of your regular exam and checkup, plus a little extra. We strive to provide you with a conservative and preventative approach to dental care so you can spend less time at our practice and more time focusing on the things in life that are important to you.

A Dental Savings Club membership will both save you on your preventive dental costs and prevent future dental headaches, all at a price significantly less than traditional dental insurance.

MEMBERSHIP INCLUDES:

- Full mouth series of dental x-rays — This is a “big picture” view taken once every 5 years to check for cancer, cavities, infections in the jaw bones, and gums.
- Bitewing dental x-rays — This quick snapshot is taken once a year to check for small cavities and early onset of gum and bone disease.
- Two preventative cleanings per year — Work with our dental hygiene team to take those pesky stains off your teeth and remove any calculus and tartar.
- Two periodic dentist exams per year — At your preventative cleaning, our team will check out your smile to make sure you are cavity free and that your gums and bone are healthy. We’ll also complete an oral cancer screening every time.
- Two fluoride varnish applications — When applied twice a year or more, fluoride varnishes can prevent cavities in kids and adults! Traditional dental insurance stops covering these at about 16 years old, but here at The Good Dentist Teeth, we want you to be healthy and use them for a lifetime.

Pricing:

Children (Ages 12 and Under): \$16.50 Monthly or \$199 Yearly

Adults (Ages 13+): \$25 Monthly or \$299 Yearly
