TIPS FOR TAKING SUPPLEMENTS

1. Start slowly

Consider starting with a ¼ or ½ dose for a few days as you build up nutritional support in your body. A full dose is 2 of each supplement taken twice daily. We recommend taking them at breakfast and lunch!

2. Make it a lifestyle

Taking supplements the same time daily creates a ritual alongside meals or something else that is a constant in your routine. Keeping them out where you can see them will remind you to take them, as opposed to leaving them hidden away in high cupboards.

3. Keep at it

The longer you take your supplements, the more you will experience the maximum amount of support that comes over time.
