Our Catholic Faith: Students will study the life of Jesus, the teachings of the Church, and stories from the Bible to understand the One who is the Way, the Truth and the Life. Our faith will inform our approach to every academic discipline.

Literature and History: Students will read classic books and stories that explore good and evil, courage, sacrifice, and love. They will also study the history of civilizations that laid the foundation for our world today. They will discuss what these stories and cultures tell us about the universal human experience.

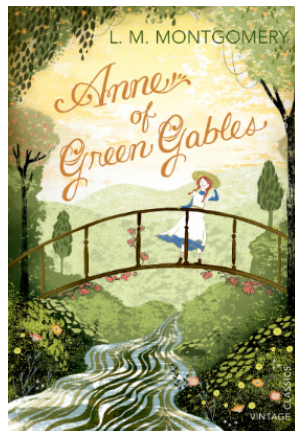

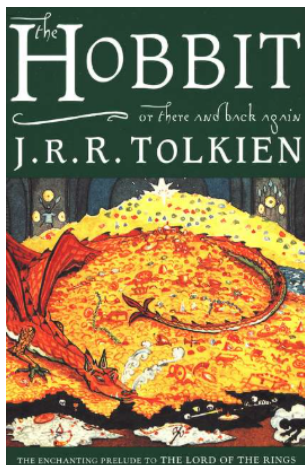

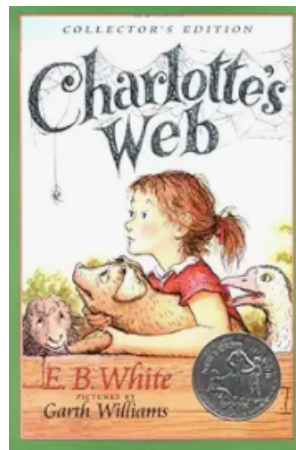

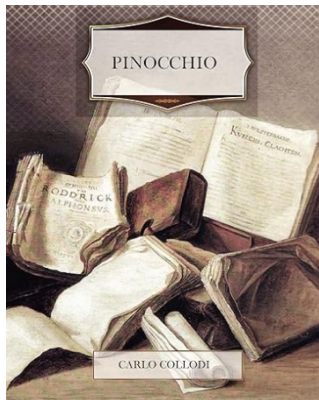

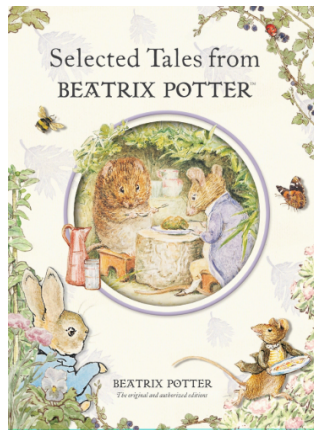

Science and Math: Students will discover the order and patterns in the world as part of God's design. Learning about the stars, animals, and ecosystems can reveal the beauty and truth of creation.

Art and Music: Students will examine pieces of art and listen to classical music, cultivating habits of careful observation and developing a deep appreciation for creative expression. They'll also learn skills to create their own beautiful pieces of art and music.

Foreign Language: Students will delight in learning Latin through stories and song. As they get older, they will learn formal grammatical structures so that they come to a deeper appreciation of the language that shaped Western history and a fuller understanding of their own language.
