

5 TIPS FOR TAKING BETTER PHOTOS

1. FIND THE LIGHT

Play around with how lighting looks on the subject from different angles. Notice the difference at the subject back, from the side and straight on. Rule of thumb is natural indirect light.

2. CAPTURE THE DETAILS

Photos aren't just about the big picture. Capture hands holding or even doing an activity. Capture only their feet as they are reading a book or the way their mouth looks as they sleep. The little details are just as special as the whole person,

3. SHOOT DOWN THE NOSE

It's always more flattering to shoot a little from above than up someones nose.

4. DON'T BE AFRAID OF CANDIDS

Authenticity comes from candid. Your subject doesn't need to be posing to get the shot. Let kids run, and play. Those are the images that will evoke feeling.

5. EDITING

The step so many people miss. Straighten the frame and don't forget to edit with your Casa Camhi Mobile Presets!
