Dress
Upcycle

Hi. I'm Easy!

UPCYCLED DENIM SKIRT IN 10 EASY STEPS!

This is the world's easiest denim skirt to make. and it always looks good.

First, you **need jeans that fit** at the waist.

1. **Cut** off the leg of the pants below the knee or **midi length**.
2. **Cut open the pant legs and lay them flat for the rectangle shapes front and back.**
4. Lay the pants down on a table **in an A-Line shape and cut open the inseam of the pants.**
5. **Lay the rectangle** piece you just cut open **to above the crotch** but below the zipper. While making sure the bottom of the rectangle meets the hem of pants and the two connect or cross over.
8. **Pin each piece in place** and topstitch on.
10. **Trim the extra fabric** from the inside.
