Learn to understand how consciousness communicates with matter, the relationship between thoughts, emotions and cellular function, direct perception plant communication, flower essences and a range of vibrational modalities that support the healing process.

This course combines a strong foundation in the science of quantum healing with a deep study of consciousness; left and right brain hemisphere attention and processing, unconscious and collective unconscious vibrational archetypes, and mind-body healing with vibrational medicine.

The course explores healing diets, culinary and medicinal herbs, essential oils and flower essence therapy in-depth, as a profound opportunity to support healing of thoughts and emotions that hinder our path towards wholeness, peace and conscious experience of life.

The course also introduces students to traditional and indigenous perspectives on the relationship between subtle energies of mind, emotions and the physical body, including study of Ayurvedic, Chinese and other traditional elemental systems.

## *Healing Diets Immersion*

The 5 day Healing Diets Immersion is a delicious, delightful hands-on experience that provides the foundation for inspired, creative preparation of therapeutic nutrient dense foods. Students participate in establishing the rhythms of a living foods kitchen, moving from cleansing to health building, and culminating in gourmet raw food preparation.

Practical time in the kitchen is interspersed with lectures that focus on consultation and programme creation skills.

In this Immersion you will learn how to bring magic and inspiration into your relationship with food, along with the foundation to share this knowledge with others.

## *Herbal Medicine Immersion*

The 5 day Herbal Medicine Immersion focuses on practice, consultation and program creation skills required for effective practice.

Consultation skills are developed in alignment with a core principle of natural medicine; Doctor as Teacher, thus training students how to establish a genuinely holistic patient-practitioner relationship.

Practice and Pharmacy administration protocols and development are also explored, with the opportunity for students to refine their vision for their future practice.

## *Essential Oils & Healing Touch Immersion*

Essential oils are plant medicines that have a unique resonance with the emotional body. Their complex chemistry and high frequency has a direct effect on cellular and DNA memory, permanently releasing trauma while increasing oxygenation to the pineal and pituitary glands. Essential oils also support healthy functioning of the endocrine, immune, nervous, respiratory, circulatory and digestive systems, are naturally anti-bacterial, anti-viral and potently anti-inflammatory, increase focus and memory, increase right-hemisphere processing of life experience, increase coherence between mind and body and are effective anti-depressants and mood elevators. Their therapeutic benefits are enhanced by the beauty that they bring to day to day life.

The five day Essential Oils and Healing Touch Immersion focuses on experiential healing processes that combine essential oils with techniques to balance sympathetic and parasympathetic nervous system function and heart-brain coherence, allowing for deeper connection and receptivity to self healing.

## *Quantum Botanicals Immersion*

This 5 day immersion focuses on plant based vibrational medicine. Within the context of current understanding of energy, space, matter, organised energy fields, and the fractal nature of body, mind and emotions, students learn how the interconnectedness of mind and body can be harnessed to support self healing and evolution of consciousness.

The study of flower essences is structured around the 38 Bach Flower Remedies as we learn about the 12 Healers (core personality types), the 12 Helpers (for when the core personality is obscured by long-term disassociation or environmental influences) and the 19 Situational Remedies (for current internal and/or external stresses and influences).

## *School Philosophy*

School of Natural Medicine was founded in 2007 on the principles of pure Naturopathy, which incorporates a holistic approach to the treatment and prevention of mind-body imbalances that lead to disease.

We seek to educate students in an authentic system of natural medicine that can be traced to the teachings of Stoicism in ancient Greece, and that was incorporated into a system of medicine by Hippocrates, widely regarded as the father of modern medicine.

The first principle of Natural Medicine, as stated in the Hippocratic Oath, is 'Do No Harm.'

This core foundation is integrated with advances in the fields of nutrition, psychoneuroimmunology, heart-brain coherence, epigenetics, phytochemical research, and holistic anatomy and physiology.

Our Natural Physician Diploma program is in alignment with the World Health Organisation definition and guidelines for Naturopaths; a definition that was created through the contributions of more than 274 reviewers, including experts and national authorities, as well as professionals and non-governmental agencies.

Naturopathy is a profession that is practiced throughout the world, with Eastern and Western Europe, Scandinavia, Australia, New Zealand, South Africa, Canada, Russia, India and the United States having the highest numbers of practicing naturopaths.

Naturopathy is classified as a traditional medicine and has evolved, since ancient times, as a deeply rooted part of European natural medicinal systems.

From Europe, Naturopathy has found its way, with the founding fathers of the United States and the Commonwealth, to all parts of the world settled by those of European descent.

**Naturopathy is a discipline of accumulated knowledge of effective natural therapies, diet, herbs and lifestyle in practice, and does not have a single originator. It is a part of our heritage.**

We invite you to join us on one of our certification or diploma courses, and begin your journey toward creating a life out of what you love!
