REFERENCE LETTER

I recommend and support Nadia's Riley architectural practice. As an architect, she is fully engaged in Zoo Design. Her research skills and ambition to develop zoo architecture are impressive and will be of great value for the zoological world. She is focused on working to improve the welfare of animals in zoos, the quality of staff working environments and the experience of visitors.

She has been collaborating with us during last year in a verity of projects that have made a great visible input to the Warsaw ZOO.

Knowing her quality of work I'm deeply convinced that she will help you to modernize your Zoological institution.

Anna Tadra
