

IMPACTFUL LEARNING AND TECHNOLOGY USE COHORT

Effective use of technology allows educators to understand each learner's needs and readiness level, create engaging learning experiences, and assess progress over time. In this blended cohort, participants will dive deep into a model for what high quality technology integration looks like, get hands-on practice with new strategies and resources, and leave with an action plan for how they will continue to use technology to enhance the student learning experience. These cohorts combine live workshops, recorded content, and additional resources to grow the confidence and skillset for teachers. These cohorts can also be customized to meet teacher's readiness level at basics or beyond basics.

Teachers will:

- Reflect on their perception, skillset and use of technology integration with students
- Get actionable strategies and techniques to increase student engagement in their classroom
- Increase their flexibility to meet the needs of all learners
- Develop ready to use resources and implementation plan

	SYNCHRONOUS	ASYNCHRONOUS
WORKSHOP 1	Reflecting on My Practice for Impactful Learning and Technology Integration	Recorded Facilitation, Strategies, and Implementation Activity
WORKSHOP 2	Creating Engaging Lessons for Impactful Learning	Recorded Facilitation, Strategies, and Implementation Activity
WORKSHOP 3	Student Engagement for Impactful Learning	Recorded Facilitation, Strategies, and Implementation Activity
WORKSHOP 4	Assessment for Impactful Learning	Recorded Facilitation, Strategies, and Implementation Activity
WORKSHOP 5	Building an Action Plan for Student Learning	Recorded Facilitation, Strategies, and Implementation Activity
