

Installation Tutorial

FOR ANDROID

STEPHANIE KASE
EDUCATION

quick note

Your phone might look slightly different based on your version & type of phone, but the general steps should remain the same if you are using an Android.

Please reach out to support@stephaniekase.com if you have any trouble following these instructions and installing the presets!

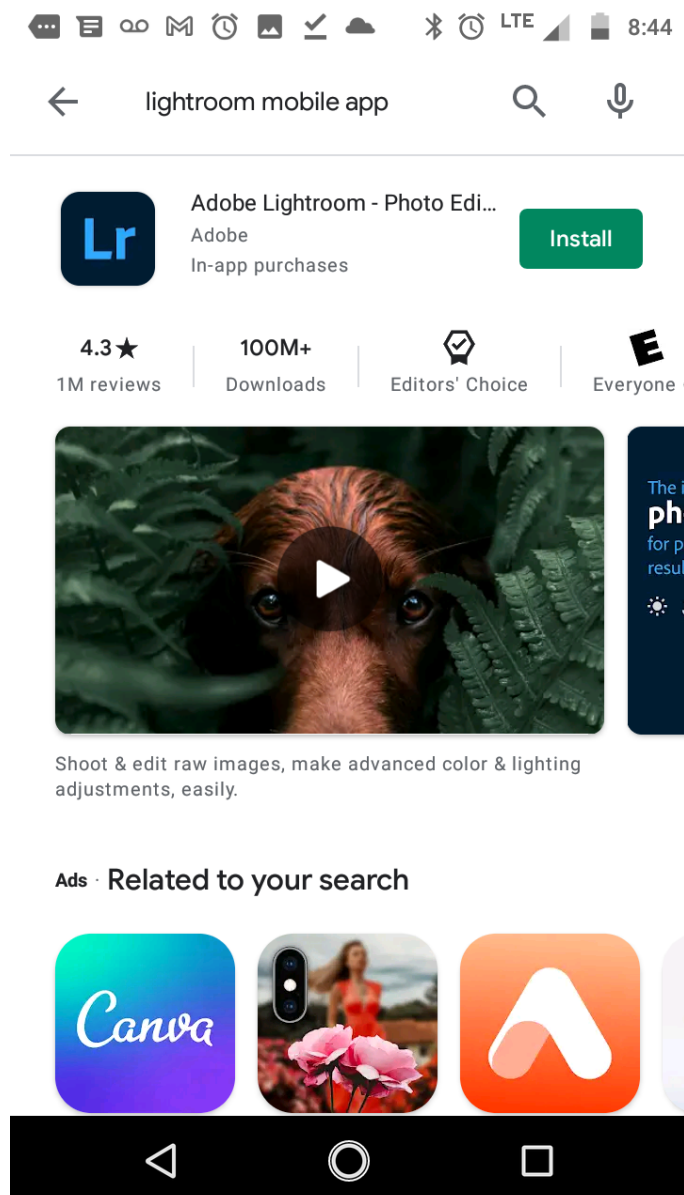

Step 1

Install the free Lightroom Mobile App. Tap here to install:

https://play.google.com/store/apps/details?id=com.adobe.lrmobile&hl=en_US&gl=US

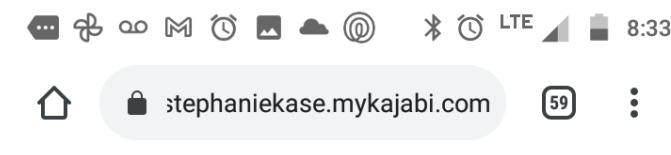

or open your Google Play Store app, and search "Lightroom Mobile App."

Below is the app you want to install. After you install and open the app, create a free Adobe account to sign in.

Step 2

Once you purchased the presets, this is the page it should automatically navigate to. If you aren't already on this page, pull it up on your Android. You can navigate back to it by [logging into your account](#) on your Android. After logging in, head to "Download here!" or you can [click this link](#).

Installation Tutorial

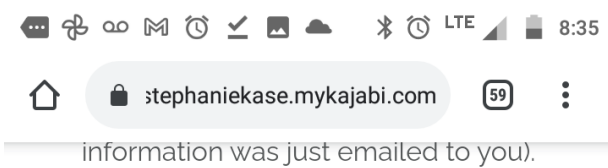

Click the button below to download the tutorial on how to install your presets!

Download Installation
Tutorial

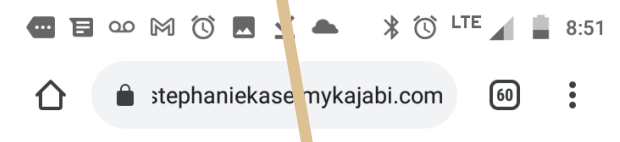

Step 3

Scroll down until you see one of the preset photos (01. Classic is the first one).

Tap on the photo, then tap "Download."

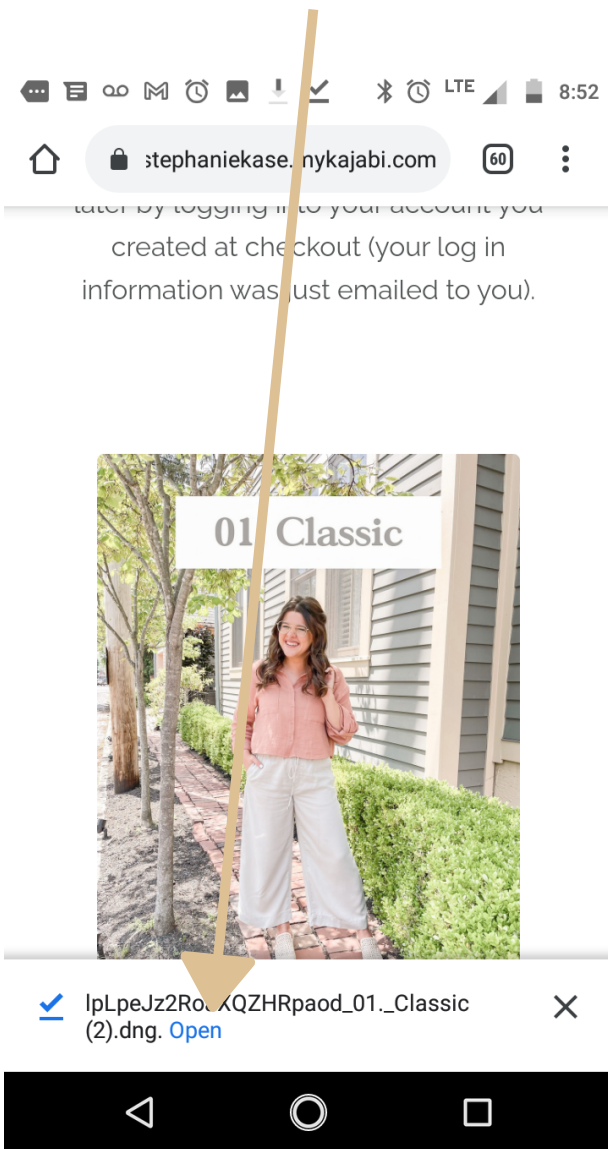

Do you want to download [LpeJz2 RoaXQZHRpaod_01._Classic.dng](#) again?

Cancel

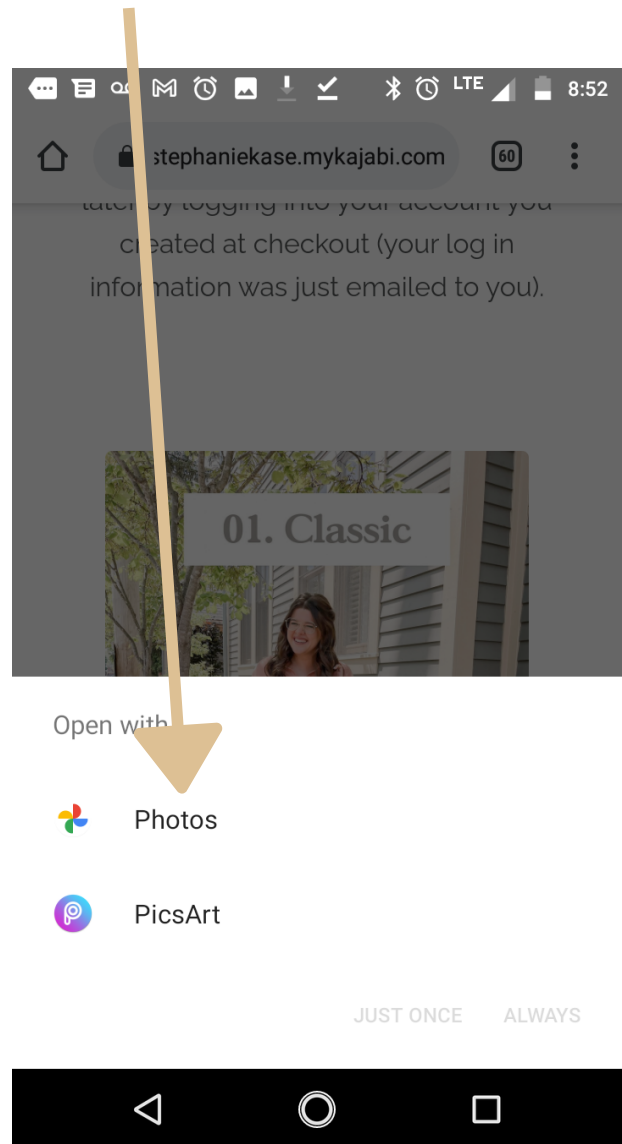

Download

Step 4

Once it is done downloading, tap "Open".

Now tap open with "Photos" (or you can use "Gallery" if that's an option for you.)

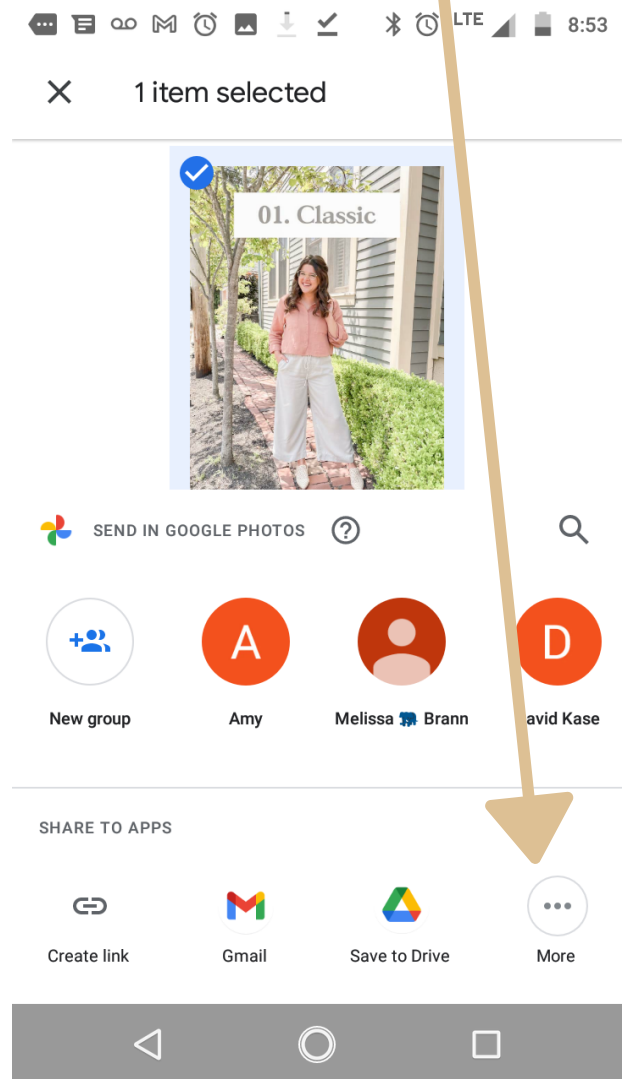

Step 5

This screen will now pop up.
Tap the "Share" button in the
bottom left.

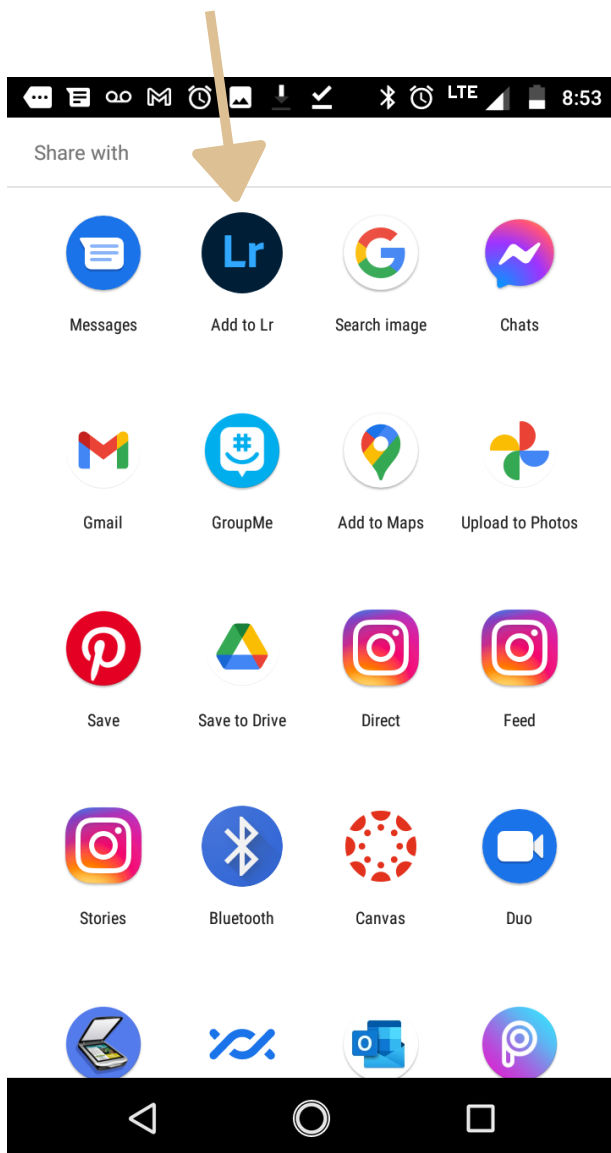

Now this is what you should
see. Under "Share to Apps,"
tap "More"

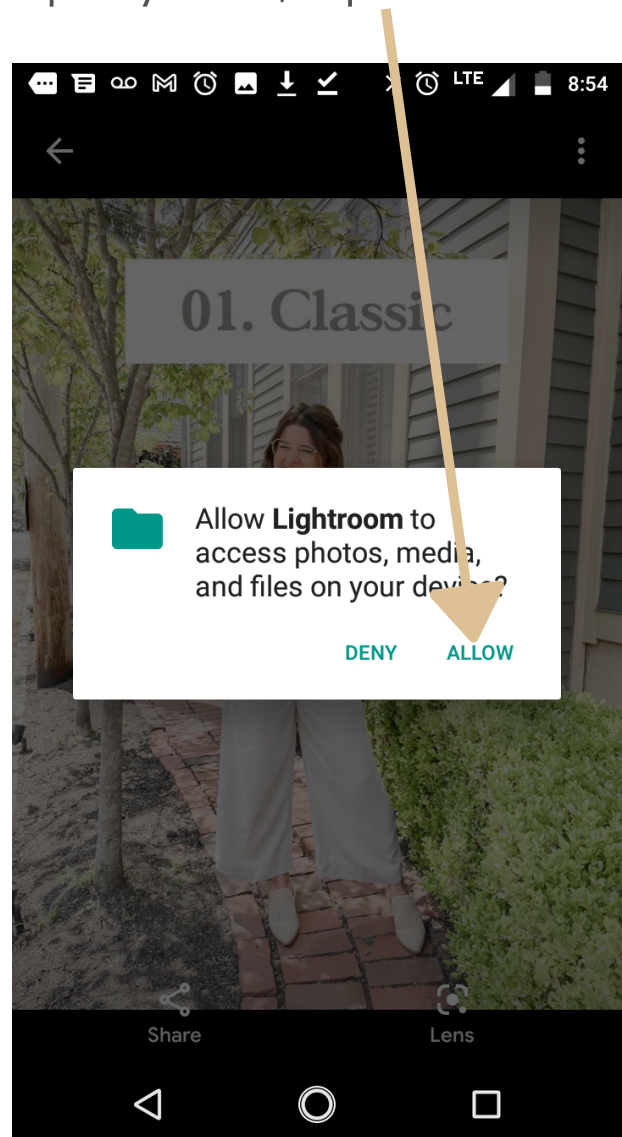

Step 6

You'll see your whole list of apps now. Tap "Add to Lr."

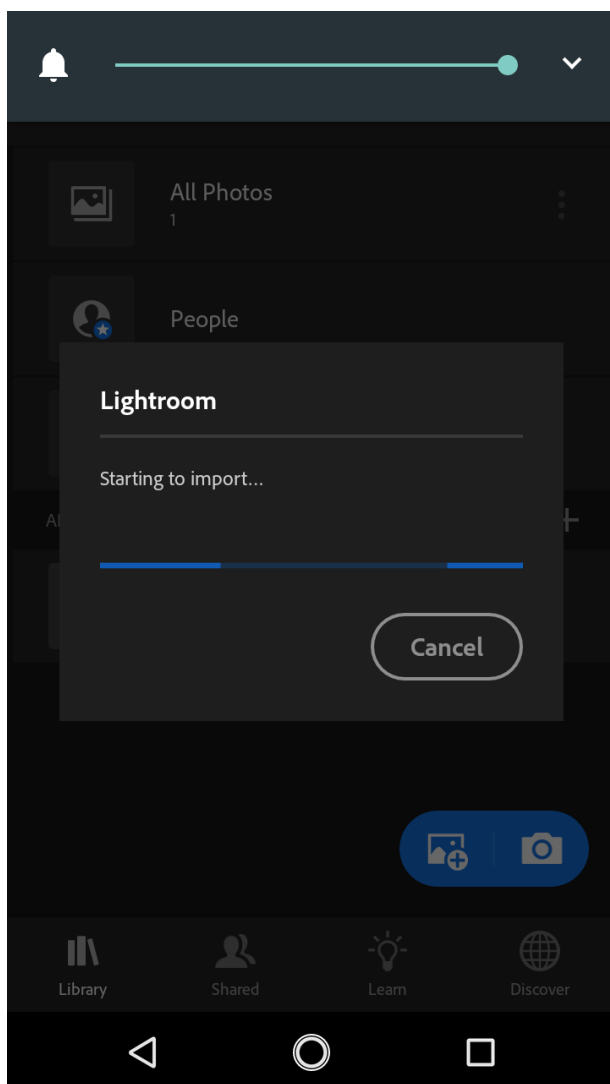

You may see this bubble pop up. If you do, tap "Allow"

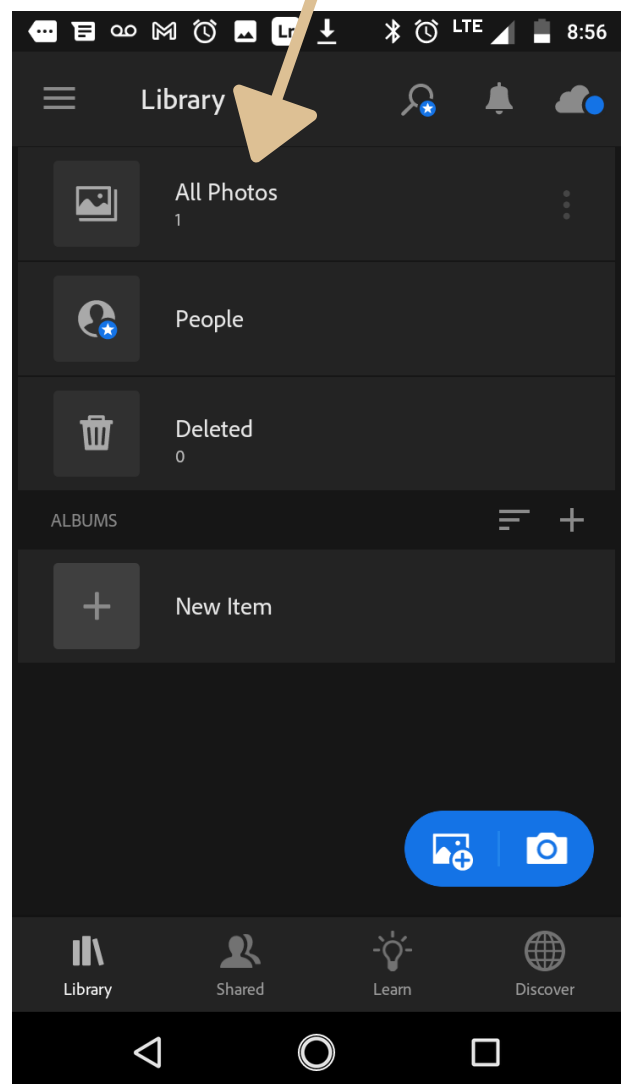

Step 7

As it's importing, the Lightroom app will launch. Wait for it to finish importing.

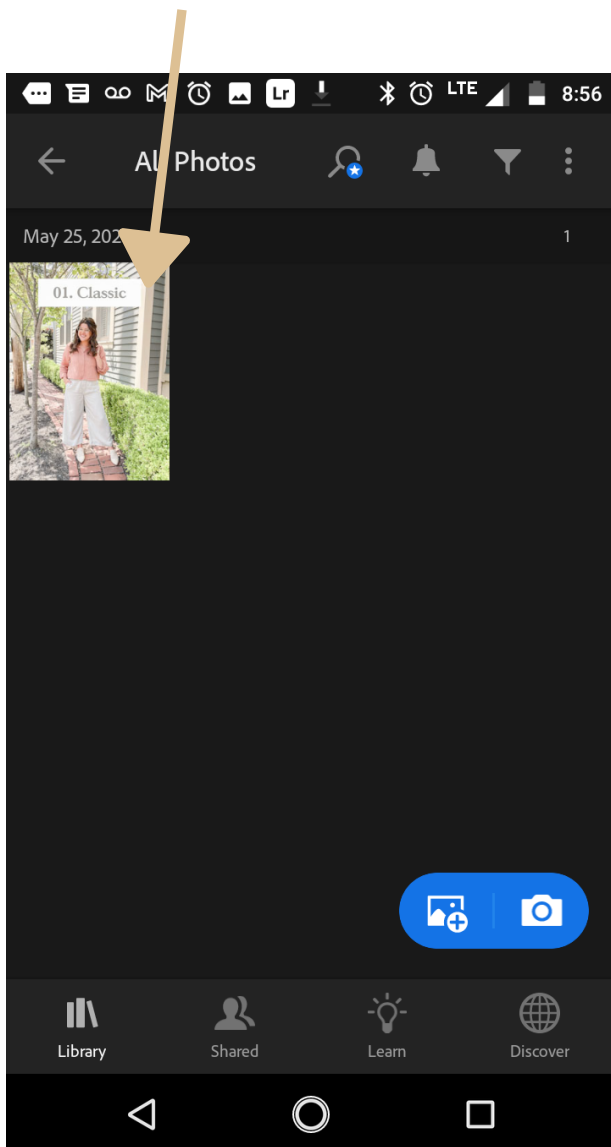

Once it's done importing, it will be in "All Photos." Tap it to view the photo.

Step 8

Your photo is the last one added (at the bottom if you already have photos added). Tap on the preset photo.

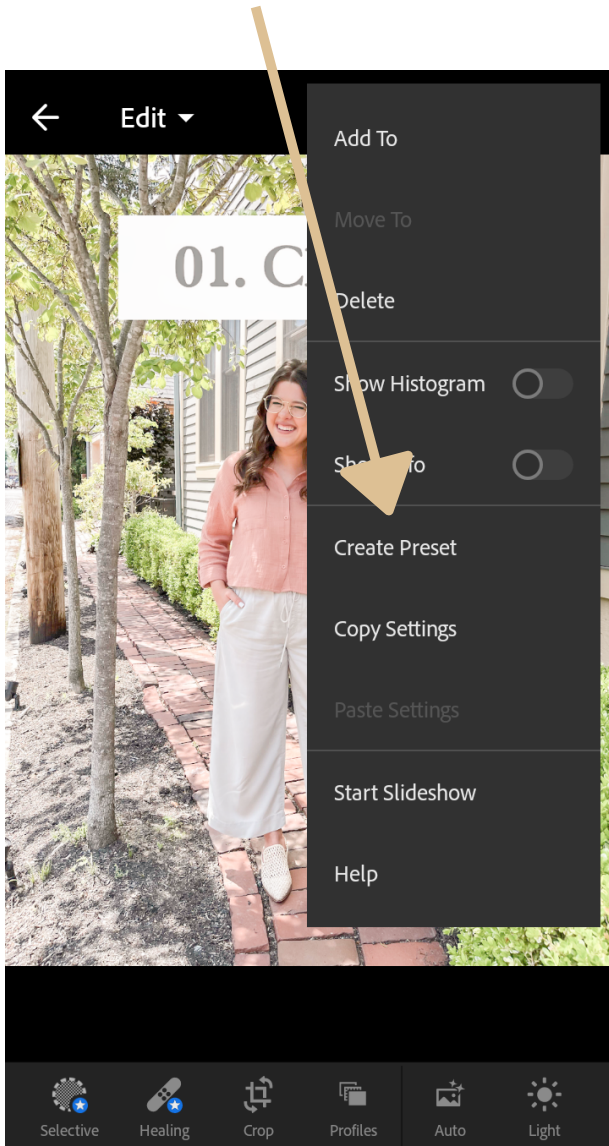

Once you open the photo, tap the little three dots in the upper right corner.

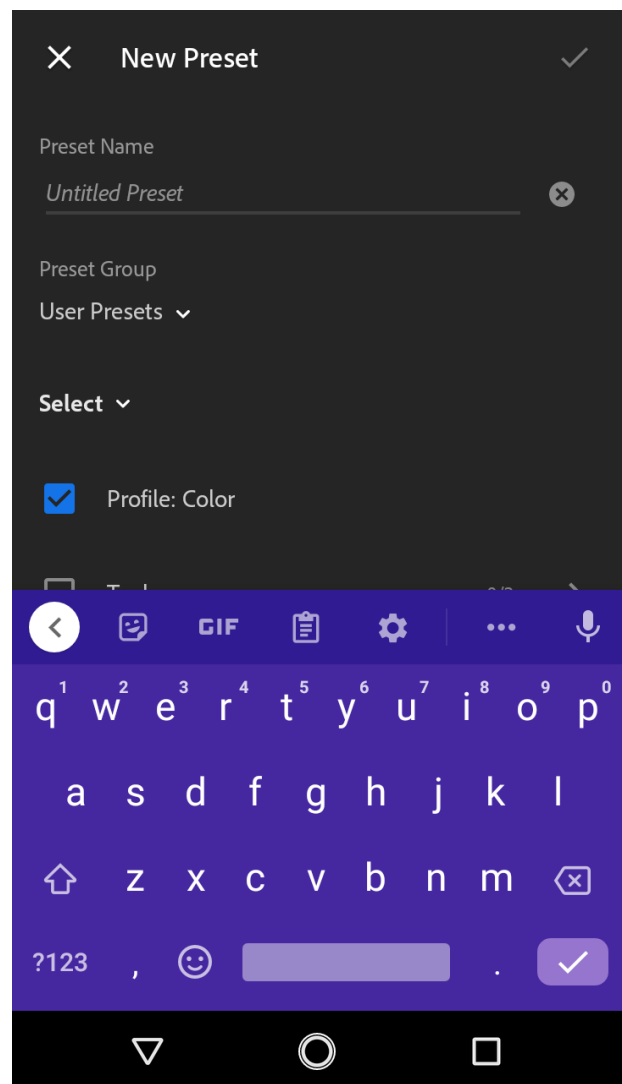

Step 9

Tap "Create Preset"

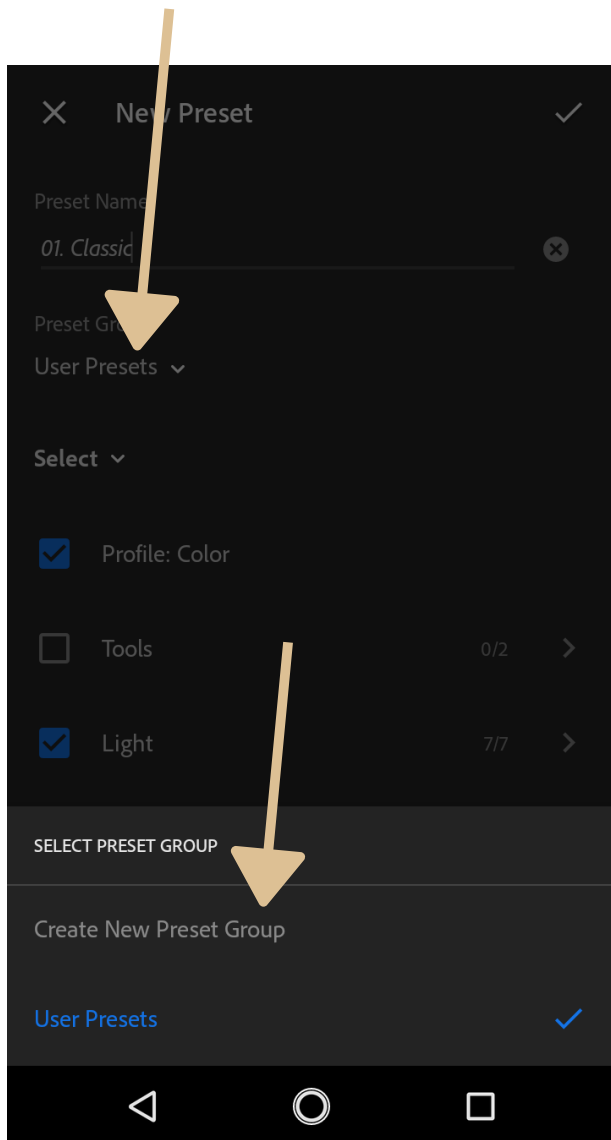

Type in the name of the preset on the photo (this one is 01. Classic).

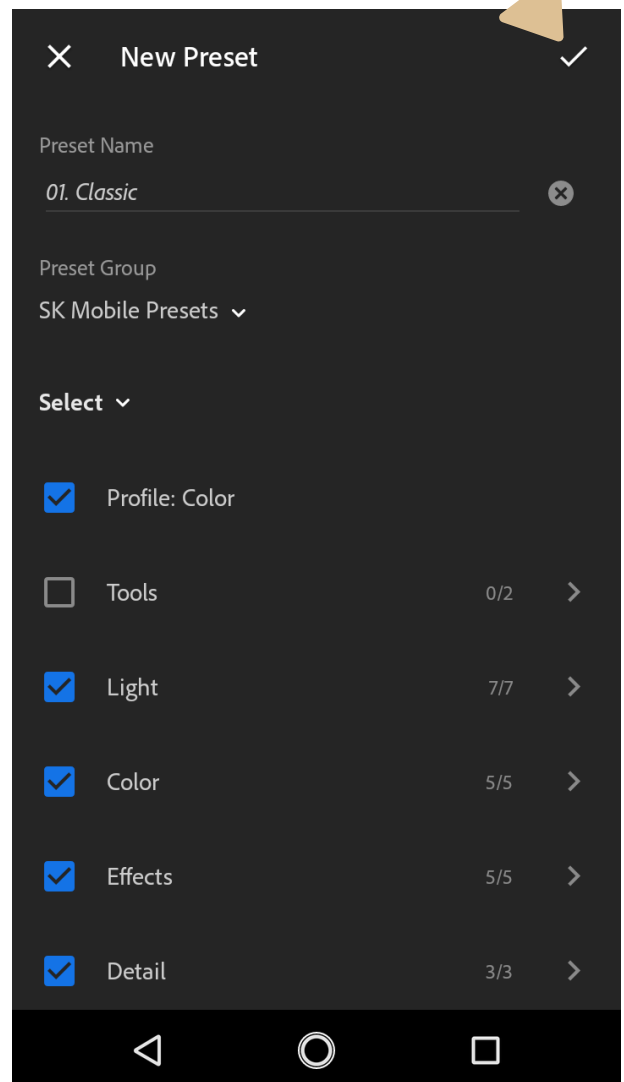

Step 10

Now tap where it says "User Presets", then tap "Create New Preset Group." Name it SK Mobile Presets.

Here are the final preset settings. Once complete, tap the checkmark in the upper right corner.

Now go back and repeat steps 2-10 for all 7 presets that came with your preset pack! Once you've finished the steps for each presets, your presets are installed.

Watch the Lightroom video tutorials to see how to use the presets in Lightroom!

THANKS FOR MAKING IT THROUGH!

Use the hashtag!

Be sure to use #stephaniekasepresets and tag me @stephanielynnkase when sharing your photos on Instagram! I'd LOVE to see how you're using them. I am truly BEYOND excited for you to use your mobile presets!
