

How this works

Use the worksheets on the following pages to plan out your wedding day timeline. You will see on the sides of the worksheet there is text labeled "photographer coverage". This is for you to bracket out the hours of your wedding day coverage to show you what your wedding photography coverage will document.

There is an additional worksheet for listing out what time vendors have been scheduled to arrive and/or leave.

If you'd like more hands on timeline construction, please let me know and we can set up a consultation time!
