

INTERIOR DESIGN

Designing Women

Design duo Amanda Purdom and Eryn Smith were friends and neighbors first before starting AsterHouse Design in Manhattan in 2011.

AsterHouse Design is a furniture and interior design boutique located in Manhattan, Kansas. Specializing in both residential and commercial design, Amanda and Eryn collaborate with clients to create spaces that are tangible representations of the client's lifestyles, tastes and visions. Describing their signature style as "real, inviting, fresh and layered", their designs are full of light, color and texture. Always placing a strong emphasis on making the space functional and comfortably livable for the people inhabiting it, they design spaces that are not only unique, but will stand the test of time.

NEW CONSTRUCTION SERVICES

So you've decided to build: with so many materials to choose from, decisions to make, and contractor deadlines to meet, coming to final selections can be overwhelming. Simplify the process by letting Amanda and Eryn help you do everything from visualizing your new space to picking paint colors, cabinets, countertops, tile and flooring, lighting fixtures — even the location of electrical outlets. They can also enhance your investment by blending the furniture and decor from your existing space to the new home. Show homes and magazines are amazing, but the real design challenge is taking the vision for your space and blending it with reality. The reality is our lives include pets, kids, laundry, groceries and yet we still desire a beautiful, functional, livable space. A space that reflects you and the memories that make your house welcoming, comfortable and YOU!! Keeping your goals, preferences and budget firmly in mind, AsterHouse will also work directly with your contractors and subcontractors as your advocate, to help you understand and feel confident about the home you are building!

DESIGN CHARRETTE

A personalized design charrette is a collaborative session in which the designers help you draft a solution to a design problem. Troublesome floorplan? Difficulties with furniture placement? Need assistance with fresh color palettes, or unique finishes? Perhaps you wish to update your space or blend different design styles into a cohesive look. This one time visit allows you an opportunity to "pick the brain" of a designer, take the info and run with it! Offering two and four-hour charrettes; whether you need a couple of hours with a designer to keep a project rolling, confirm you are on the right track or decide where to start!

INSPIRATION BOARDS

Are you a DIY decorator but struggling with a plan? AsterHouse Design can create a plan, and leave you to run with it. Utilizing easily accessible resources, you can now make your plan a reality!

FROM TOP: Designer Amanda Purdom; designer Eryn Smith; a newly renovated design studio with over 1200 square feet of showroom space also includes a warehouse, loft office and sourcing library

Starting on a folding table and chairs in the basement of a historic red brick high school, Amanda and Eryn quickly overtook the entire lower level. After extensive renovations, the space has been transformed to include a wide selection of furniture and accessories that represent the AsterHouse Design look.
