

CAPABILITY STATEMENT

MISSION ENABLING SERVICES

PAC supports the operation and sustainment of complex mission systems. Since 2004, we've delivered superior outcomes and operational mission planning support to the MH-60R, F/A-18A/B, F/A-18F, EA-18G and KC-30A platforms. Uniquely, our team also supports the ICT security and accreditation of these systems because we view cyberworthiness as a key enabler to operational effect. We offer the following expertise:

OPERATIONAL SYSTEMS SUPPORT

Expert knowledge of mission systems including Joint Mission Planning System (JMPS) and Electronic Flight Bag (EFB), ensuring that pre, post and in-flight data enables operational decision-making. Our expertise includes:

- Administration of Windows-based networks
- Administration of Apple-based devices using VMware Mobile
- Device Management tools
- Data and asset management

FIELD SERVICE REPRESENTATION

Hands-on mission systems expertise, ensuring readiness and capability targets are achieved. Specifically:

- 24/7 helpdesk support to local and deployed users
- Comprehensive stakeholder engagement and needs analysis to provide superior operational support
- User training and up-skilling

INFORMATION SECURITY & ACCREDITATION

Our information security team has 30+ years experience working in Defence security domains. This experience—coupled with an operational focus—allows us to understand the delicate balance between system security and system functionality, establishing the most comprehensive and user-focused security solutions possible. Our expertise includes:

- Accreditation of in-service operational systems
- Information architecture advice

WHY PAC?

- Integrity, professionalism, and flexibility are core to everything we do.
- Established and trusted partner who delivers superior operational effectiveness.
- We effectively navigate the dynamic international Security Cooperation environment.
- Strategically located to support our global partners.
- Agile corporate structure, unencumbered by bureaucratic processes.
