

Hotwork Solutions

P3 Global Services, LLC

Specializing in the supply and installation of flexible pressurized safe welding habitats and/or enclosures for carrying out safe hotwork operations in hazardous locations and environments through the safe monitoring and controlling of all elements of hotwork. The habitats are made with flexible, modular panels that have been designed to overcome the typical obstacles present on the onshore and offshore production facilities. Typical utilization of these habitats includes the repair and maintenance of critical operating equipment, structural modifications and installations, or where the need for hotwork is required to be performed in a classified/hazardous area.

Rapid deployment and assembly ensures that production loss is limited or averted.

- ▶ Compact and lightweight
- ▶ Rapid mobilization of units and personnel
- ▶ Offshore versatility: platforms, rigs and vessels
- ▶ Onshore versatility: plants and refineries
- ▶ Panelized construction
- ▶ Quick erection and dismantle
- ▶ Automatic control of hotwork equipment

Hotwork Solutions

The P3 Pressurized Welding Enclosure (PWE) contains the most highly regarded features of any flexible welding enclosure on the market today. These enclosures or habitats can be safely installed and its integrity demonstrated in only a few short hours.

- 100% BSSE approval rate
- Shut-in prevention
- Limited personnel required
- Rapid assembly and breakdown
- Extensive panel size ranges
- Monitors atmospheres for LEL of H₂S, CO₂ and Oxygen
- High quality fire retardant panels
- Multi-layered for exceptional protection
- Dual seam construction ensuring positive pressure
- Completely customizable
- No waste; panels and equipment can be re-used concurrently or progressively
