

Whole Farm Revenue Protection

Whole Farm Revenue Protection (WFRP) is geared towards the diversified producer. Those who sell multiple commodities, which includes specialty crops, along with livestock.

WFRP provides one policy to cover all commodities. This plan is specifically tailored for farms up to \$8.5 million in insured revenue. This pilot comes via the 2014 Farm Bill. It is designed to be available where AGR and AGR-Lite are currently offered*; however, the plans are to expand to other counties/states as the data is made available for the actuarials. (*WFRP will eventually replace these plans of insurance.)

An important note with WFRP, the premium subsidy levels vary by coverage level, which are available with a range of 50%-85% in 5% increments.

To participate in WFRP:

- You will need to provide 5 years of farm tax history.
- Produce at least 50% of your ag commodities in counties where WFRP is available.
- No more than \$8.5 million in insured revenue.
- Have “buy-up” coverage levels on any Federal Crop Insurance plan.
- Meet the diversification requirements of the policy.

Contact your DCIS Agent for the complete details regarding this program and how it can help you with your operation.
