

PHOTOGRAPHY EDUCATION AND MENTORSHIP

Services & Pricing Guide

www.beatificvisionsphotography.com

Hello there!

I'm a firm believer in the sentiment that we grow much better and much faster together than we do when we try to go it alone. I've been lucky to have many amazing influences in my life, in both art and in business, and I am passionate about bringing like-minded creatives together to help one another. I hope my growing collection of family photography education courses helps to inspire and motivate, and I am always available to answer questions along the way.

My Journey

When I first started my photography business in 2016, I had no idea where this adventure would take me. I had been taking pictures of my own kids and of friends, and was terrified to put myself out there! If I could go back and give myself one piece of advice, it would be this: find a mentor, and don't try to walk this journey alone!

It can be scary to take the leap and invest in mentorship, but the return on investment you receive from having honest feedback and a friend who has walked this path before you is absolutely invaluable. I owe a lot of my passion and perseverance to my mom who was also a family photographer, as well as to a wedding photographer who took me under her wing and taught me so much about interacting with clients, but neither of them were navigating the same path as I was on, and it was definitely a long, unpredictable one.

My mentorship programs are specifically created for family photographers in today's day and age.

"The most challenging hurdle to overcome as an artist and entrepreneur is your own self-doubt. You can absolutely do whatever you put your mind to, and I will be cheering you on the whole time."
