

MODULE 3

Animal Facility Design

ALL ANIMAL FACILITIES

Naturalistic habitat designs that combine landscape architecture with species-appropriate spatial layouts and immersive end user experiences

CLIENTS & INVESTORS

Designed for **institutions** and **private investors** developing or upgrading a single animal habitat with modern, immersive standards.

Perfect for those wanting to reconnect animals, visitors, and natural environments through inspiring habitat design.

IMPACT & GAIN

- Establishes a clear foundation for construction, permitting, and long-term development
- Aligns stakeholders and disciplines, ensuring clarity and collaboration
- Maximizes funding opportunities through innovative, future-focused design approach

DELIVERABLES & PROCESS

1. **Conceptual Design** – habitat layout, building placement, architectural identity, and visitor flow
2. **Detailed Design** – technical drawings, planting schemes, materials, and implementation support
3. **Process** – Online meetings, on-site visits, drone session, and coordination with local architect

INVESTMENT & TIMELINE

Timeline: from 1–2 months approx.

Investment range: £10,000–£20,000

Please note: Investment varies based on facility size, ecosystem complexity, and design scope.

MODULE 3 | Animal Facility Design | ALL ANIMAL FACILITIES

Asian lion habitat – Poland

A **historically-inspired layout** designed to support Asiatic lion species-specific needs, including **varied topography** for physical activity, **multiple platforms** offering excellent views, and discreetly positioned **caves for privacy** and choice. **Feeding enrichments** are strategically placed to stimulate **natural hunting instincts**. The visitor experience honors **Warsaw Zoo's heritage** through rebuilt architecture, while breathable design combining mesh and solid walls creates **indirect experience of nature** through unique viewing moments and deeper **human-animal understanding and connection**.
