beaches of santorini

Vlychada Beach

Vlychada is an easily accessible beach, located on the south coast of Santorini featuring a lengthy beach with dark volcanic sand and pebbles.

Red Beach

Undoubtedly, Santorini's Red Beach is among the island's most captivating and distinctive shores, renowned for its striking hue.

The background image shows an archaeological excavation of ancient ruins. In the center, three large, decorated earthenware jars (pithoi) stand upright. To their left, a wooden boardwalk or platform is visible. The ground is covered with dirt and various pottery fragments, including a large decorated bowl in the lower left. The walls are made of rough, stacked stones. The overall scene is dimly lit, with some light coming from the top left.
