

# Installation Tutorial

## FOR iPHONE

STEPHANIE KASE

EDUCATION

## quick note

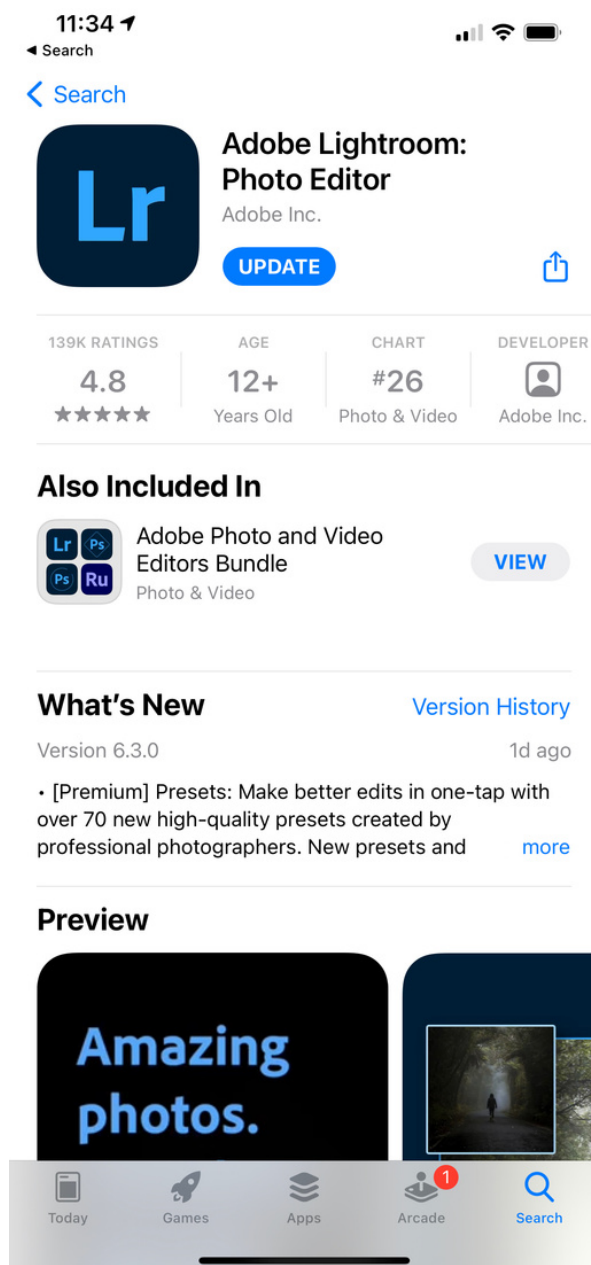

Your phone might look slightly different based on your version & type of phone, but the general steps should remain the same if you are using an iPhone.

Please reach out to [support@stephaniekase.com](mailto:support@stephaniekase.com) if you have any trouble following these instructions and installing the presets!

# Step 1

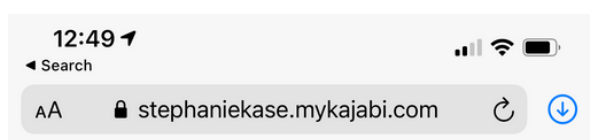

Install the free Lightroom Mobile App. Tap here to install: <https://apps.apple.com/us/app/adobe-lightroom-photo-editor/id878783582> or open your App Store app, and search "Lightroom Mobile."

Below is the app you want to install. After you install, create a free Adobe account to sign in.

## Step 2

Once you purchased the presets, this is the page it should automatically navigate to. If you aren't already on this page, pull it up on your iPhone. You can navigate back to it by [logging into your account](#) on your iPhone. After logging in, head to "Download here!" or you can [click this link](#).

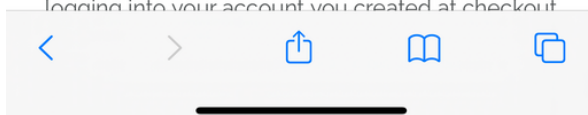

### Installation Tutorial

Click the button below to download the tutorial on how to install your presets!

[Download Installation Tutorial](#)

### Download the Presets by Clicking Each Preset Individually Below (7 Total)

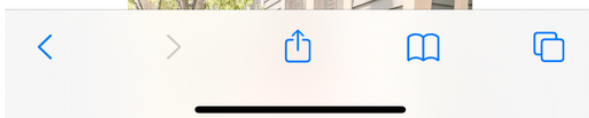

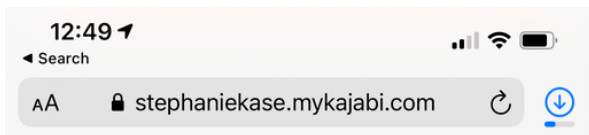

You can also gain access to these presets later by logging into your account you created at checkout.

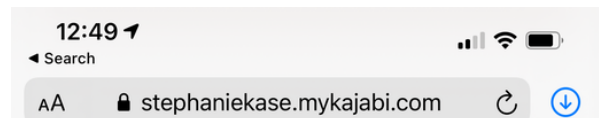

# Step 3

Scroll down until you see one of the preset photos (01. Classic is the first one).

Tap on the photo, then tap "Download."

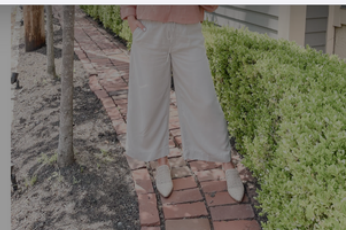

## Download the Presets by Clicking Each Preset Individually Below (7 Total)

You can also gain access to these presets later by logging into your account you created at checkout (your log in information was just emailed to you).

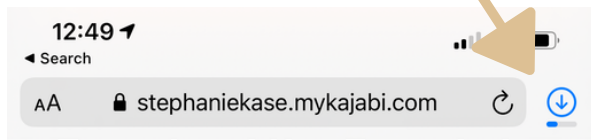

Do you want to download  
"lpLpeJz2RoaxQZHRpaod\_01.\_Classic.d  
ng"?

Download

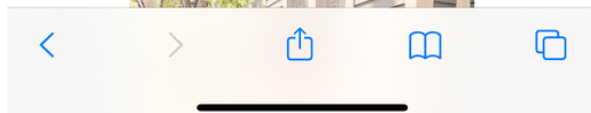

## Step 4

Once it is done downloading, tap the "Downloads" icon in the upper right corner.

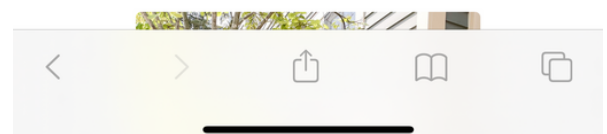

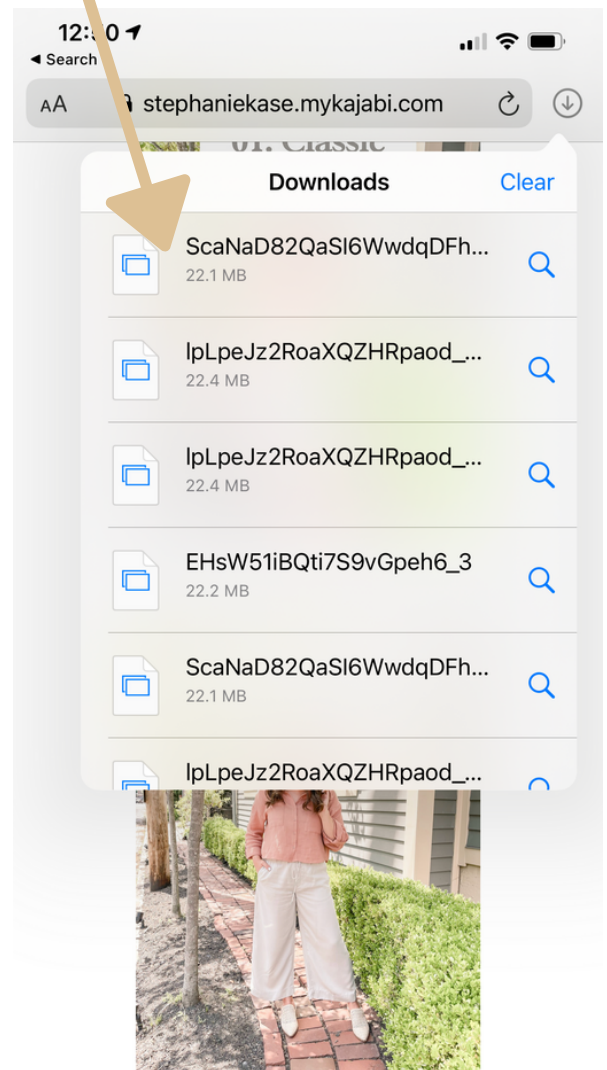

### Download the Presets by Clicking Each Preset Individually Below (7 Total)

You can also gain access to these presets later by logging into your account you created at checkout (your log in information was just emailed to you).

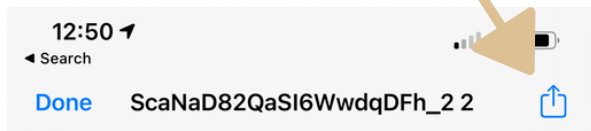

Tap on the TOP download in the list (that is your most recent preset download).

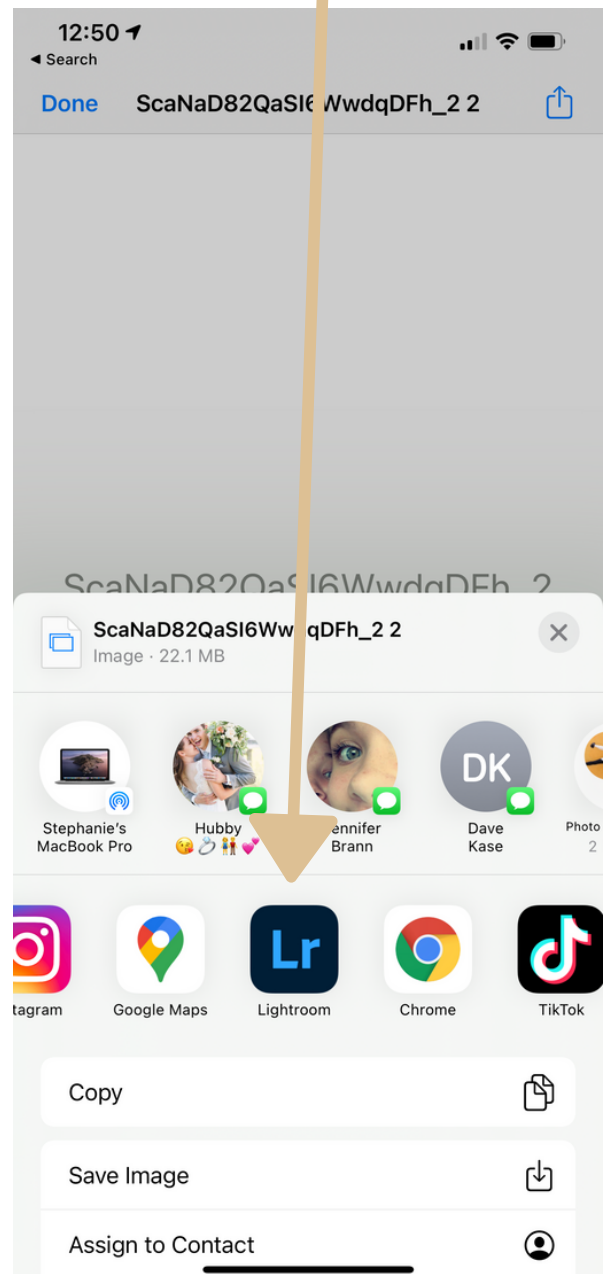

# Step 5

After tapping on the download, this screen will pop up. Tap the "share" button in the top right corner.

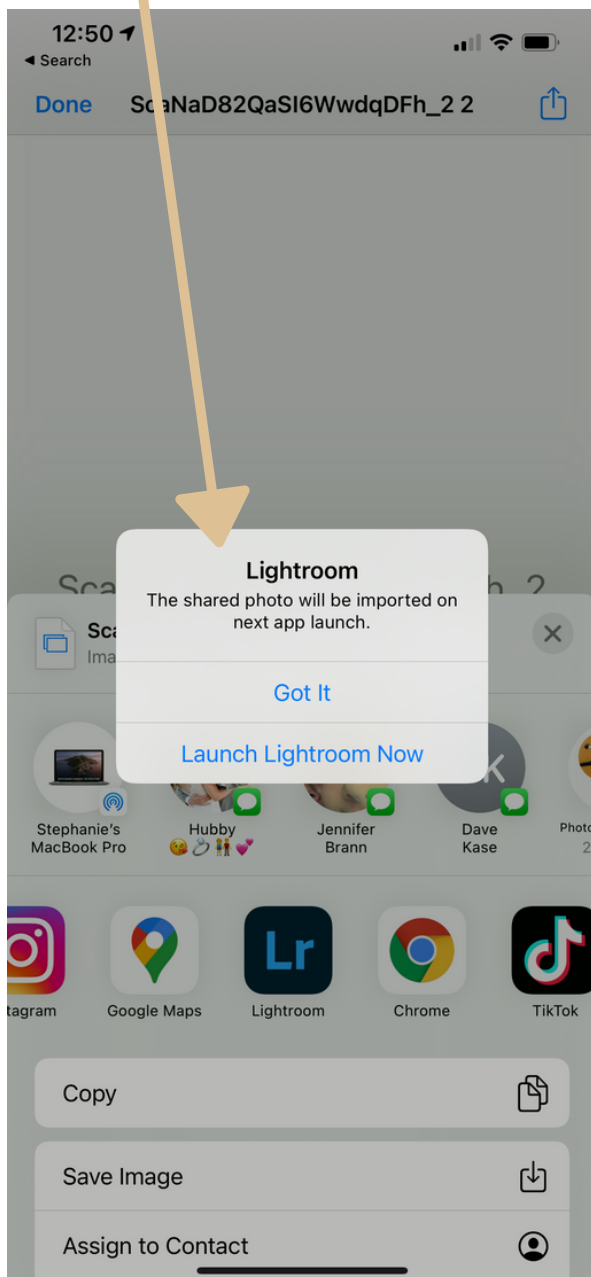

ScaNaD82QaSI6WwdqDFh\_2  
2  
Adobe raw image  
22.1 MB

This screen will pop up. Tap "Lightroom" in the list of apps (you may have to tap "more" to find Lightroom).

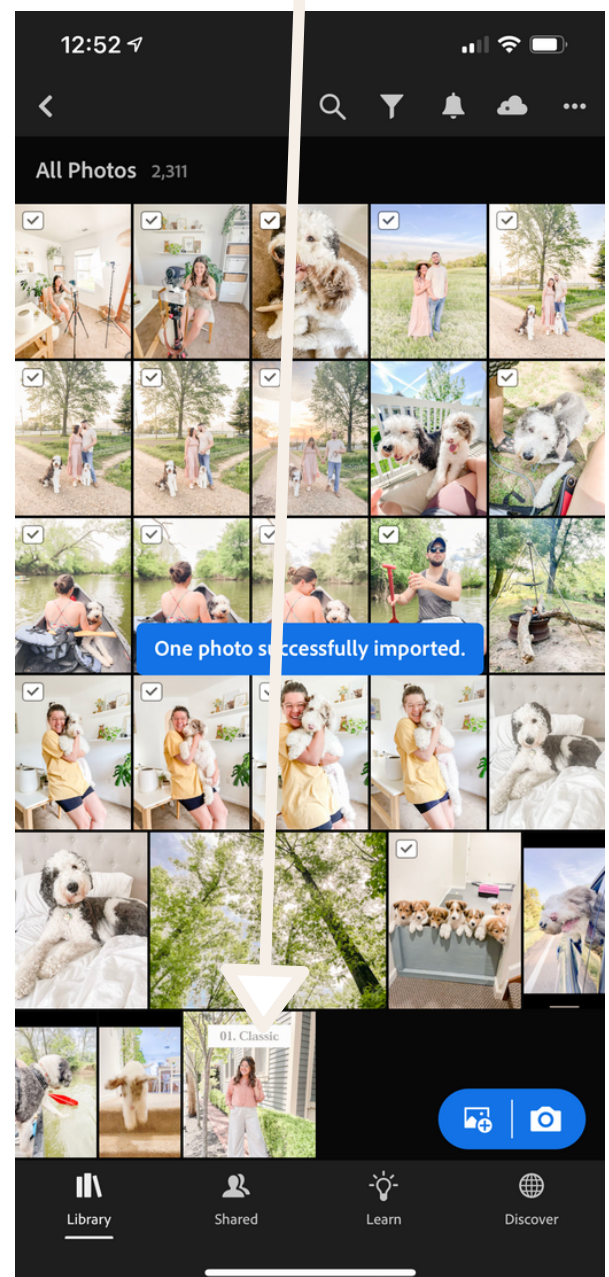

## Step 6

After tapping Lightroom, you'll see this confirmation screen. Tap "Got It"

Open the Lightroom app. You should see a blue bubble message that says "One photos successfully imported." It's now the last photo in your "All Photos" section.

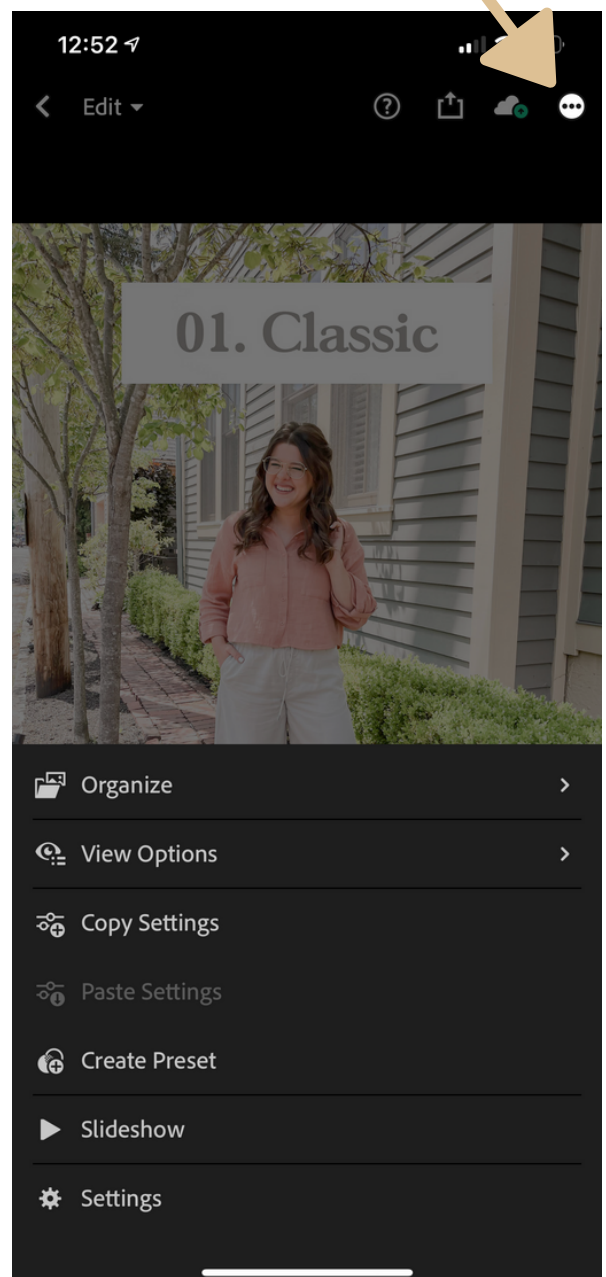

# Step 7

Tap on the photo you just imported.

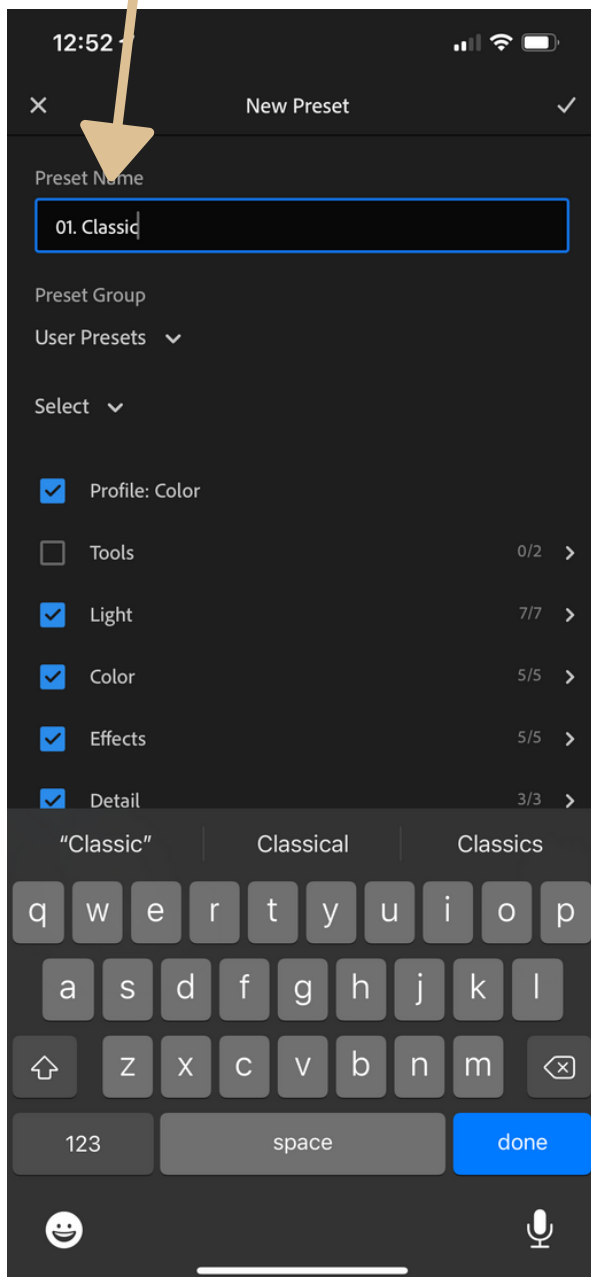

Tap on the little 3 dots in the upper right hand corner of your photo. That will show this screen.

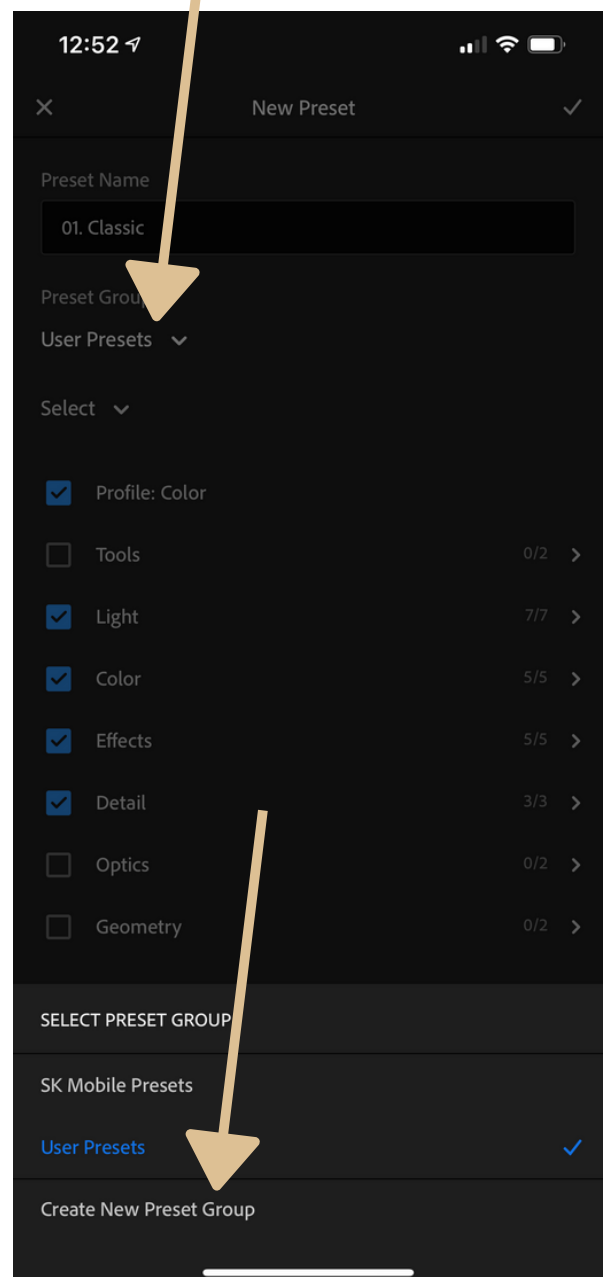

## Step 8

Tap "create preset." Then you will write in the name of the preset that was on the photo.

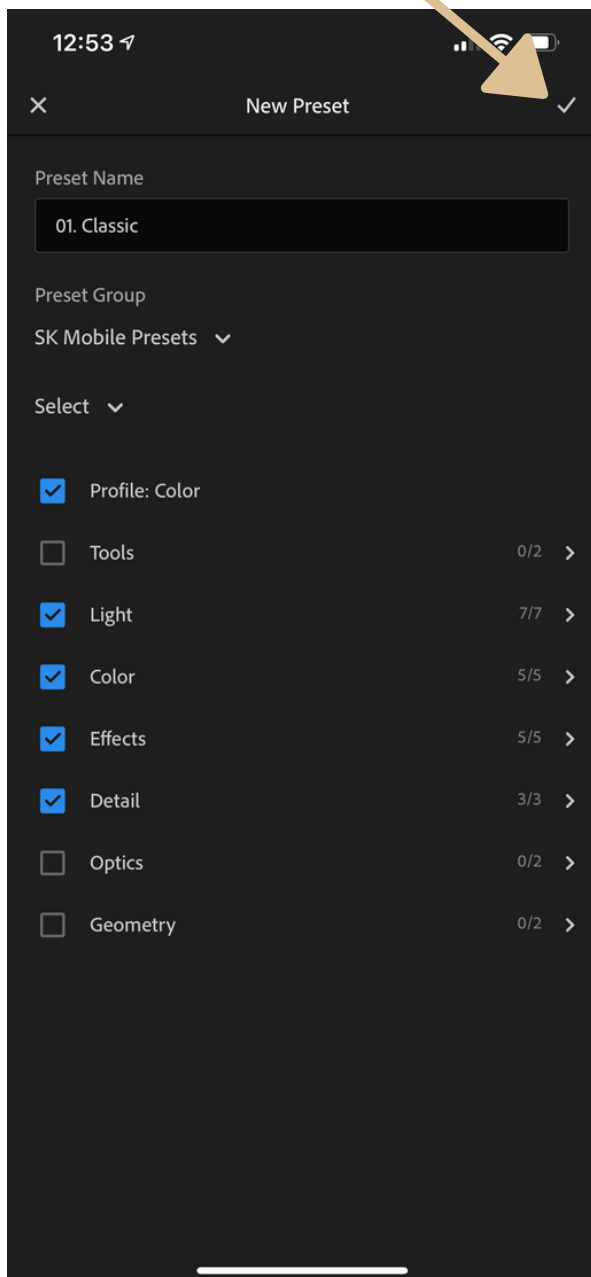

Tap where it says "User Presets," then tap "Create New Preset Group." Create a new group titled "SK Mobile Presets." Add your preset to that group.

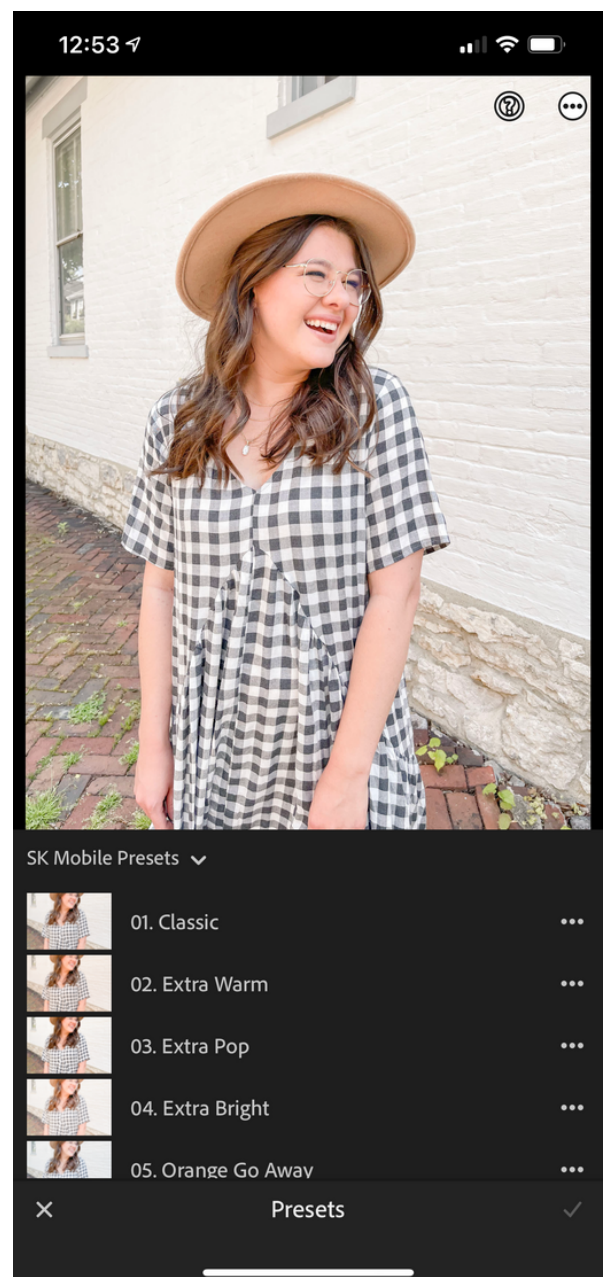

## Step 9

Here are the final "New Preset" settings. After you are done, hit the "checkmark" in the upper right corner.

Your preset is now installed! You can find it under "Presets" when editing in Lightroom. Watch the Lightroom tutorial to see exactly where to find them & how to use them!

Now go back and repeat steps 2-9 for all 7 presets that came with your preset pack! Once you've finished the steps for each presets, your presets are installed.

THANKS FOR MAKING IT THROUGH!
