

ROCKER ARM SPOT WELDER

Built to Last

The Rocker Arm welder is manufactured in the USA using the same high quality tradition that JANDA customers have come to expect since 1960.

Ready to Ship

Standard specifications:

- Available in 30 to 100 KVA
- Single phase

Versatile Product

The Rocker Arm offers great versatility for a wide variety of spot welding applications, satisfying all the requirements of heavy-duty high production industrial applications. The Rocker Arm is known for its flexibility, durability and proven performance.

FEATURES

- JANDA J800 Weld Control
- Heavy-duty steel frame
- Stacked core transformers
- Dual voltage on 20, 30 & 40 KVA
- Water cooled transformer
- Water cooled column & upper adapter
- Heavy-duty transformer tap switch
- Heli-coil inserts on copper casting
- Barrel lock arm & column
- J.I.C. standard air cylinders
- Water cooled ejector electrode holders
- Two stage foot switch with full shield

Optional:

- Retraction
- Tip Dress
- Forge
- Soft Touch safety system
