## EASY LINE

VS

## CHALLENGING LINE

Best planetary lines to live on are ones that are in domicile or exalted. Planets prefer certain zodiac signs which improves its strength. Trines or sextiles to planets are beneficial creating harmonious energy especially with Jupiter or Venus. Now if any planet is in an aspect of a square or opposition to a malefic then it is considered difficult or challenging. On the other hand, a square aspect to Jupiter or Venus are actually positive. Planets in detriment or fall can be challenging lines to live on; although, detriment condition improves with age.. However, fallen planets are very dense in energy. Shadow sides of the planet tend to show up.
